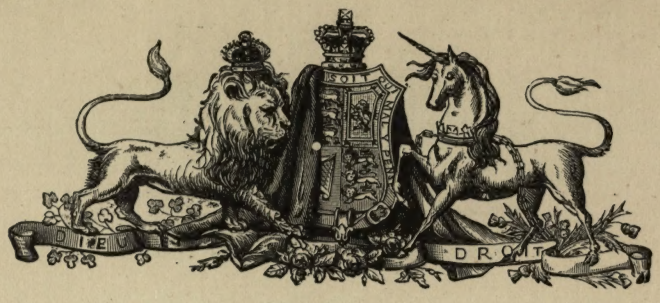
PRINTED BY J. S. VIRTUE AND CO., LIMITED, CITY ROAD, LONDON.



56, Wood Street,
Cheapside,
London, E.C.

We beg to draw the attention of buyers to the fact that we are enabled, by the large stock which we keep in our extensive warehouses, as well as in the bonded warehouses, to execute within twenty-four hours after receipt, nearly all orders with which we may be favoured.

Each department has a competent buyer, who, after having made himself acquainted with all the details of the manufacture of the goods which belong to his department, has made the articles he buys a special study for many years.

By having but one fixed price throughout the whole of our establishment, we have endeavoured to gain, and trust have succeeded in gaining, the confidence of our customers. Only the wholesale and shipping trade supplied. If a reduction in any article take place, the full benefit is given to the customer; and if any articles published in our Catalogue advance in price before the receipt of an order, the goods are sent, in nearly every instance, so as not to disappoint the party or parties ordering, who naturally expect to receive the goods ordered, even if the execution of such an order leave a small loss.

The numerous illustrations shown in this Catalogue will give an approximate idea of the class of goods sold by us, our stock being renewed almost every two or three months. Our close and personal attention to all orders intrusted to us, ensures their prompt and correct execution.

19. 12. 98

[Entered at Stationers' Hall.

When large quantities, as, for instance, a hundred dozen to a thousand dozen of any article, are ordered, we are frequently enabled to give a reduction in price on such orders. Whenever this can be done the extra allowance is given. Being able to buy largely of almost every article we deal in, often places us in such a position that we can sell as cheaply as, or cheaper than, the manufacturer who supplies customers that buy smaller quantities.

To facilitate the making out of indents, we have divided this Catalogue into two parts, of which this is the second. A list of the contents of the first part will be found at the end of this book; and we think that it will be to the advantage of our customers, should they wish to favour us with their orders, to leave the choice of goods, more or less, to our discretion, as they would then be certain to receive only the latest productions. For instance, when ordering it would simply be necessary to say,—Send a case of goods, assorted, from such a price to such a price, the total value not to exceed whatever sum may be fixed upon. We should prefer to receive all orders through the medium of respectable firms established in Great Britain, and orders must be accompanied by bankers' drafts or letters of credit authorising payment in London against delivery of bills of lading.

Yours respectfully,

SILBER & FLEMING.

P.S.—Orders sent by intending purchasers who have not an account with us should be accompanied by bankers' drafts or references to established firms in London.

TRADE MARK.

ALL PRICES QUOTED IN THIS CATALOGUE ARE NETT.

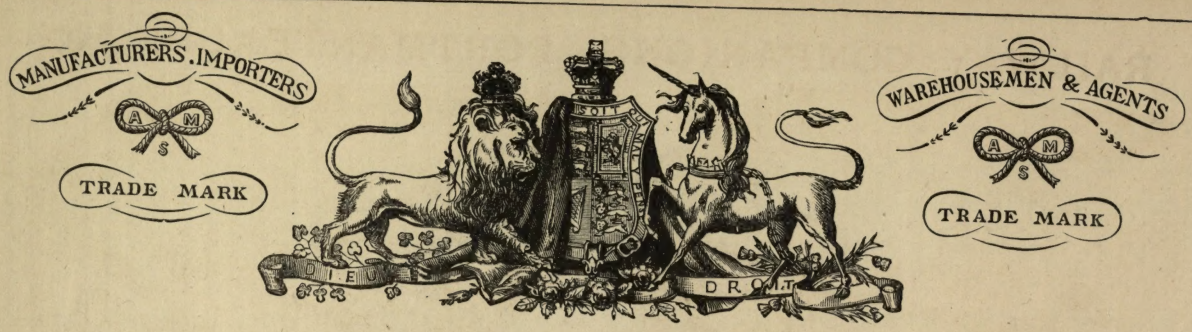
☞ As almost every article represented in this Catalogue is kept in stock by us, and can in most cases be dispatched within a few hours after the receipt of order, you will thus be enabled to supply your customers with the goods at the shortest notice.



TRUNKS, PORTMANTEAUS, HAT AND BONNET BOXES,

LADIES' HAND BAGS AND TRAVELLING BAGS.

When, more than a quarter of a century ago, we introduced these goods—to the manufacture of which we always paid special attention—they soon found a ready sale in all markets to which they were introduced. Our customers soon satisfied themselves that, making allowance for the solidity and careful finish of our Leather Goods, they were the best market-value obtainable.

The sale of our Leather Goods at the present moment is sufficient evidence that our endeavours to give the best value have been successful.

FITTED DRESSING BAGS.

From 18/ to £250 each.

We beg to draw your attention to the illustrations on pages 17 to 27, which will give some idea of the various shapes, sizes, and qualities of Bags introduced by us.

FITTED PICNIC BASKETS, CANTEENS, AND FLASKS.

The great variety of these Goods shown on pages 31 to 37 and page 42 justifies us in thinking that a larger assortment has not yet been shown, especially at the low prices quoted.

LADIES' AND GENTLEMEN'S FITTED DRESSING CASES.

From 2/9 *to* 100 *guineas each.*

The illustrations and descriptions on pages 43 to 49 and 53 and 54 give an indication of the assortment we always keep in stock.

SADDLERY AND HARNESS, WHIPS AND STICKS,

In every variety, of the best manufacture, including specialities for India and the Colonies.
Special quotations given when quantities are ordered of any one number.

BICYCLES AND TRICYCLES.

Every improvement in these vehicles, after being well tested, is introduced and adopted by us, and the advantage of the same given to the purchaser, if possible, without any extra charge.

Most of the accessories now used by Cyclists will be found illustrated on pages 62 and 63. Those not quoted in this Catalogue can be supplied to order.

SILBER & FLEMING'S
PRICES OF BICYCLES AND TRICYCLES.

BY THE COVENTRY MACHINISTS' COMPANY.

No. 1046. The "Club Racer" Bicycle.

RAKE ½IN. TO ¾IN.

This Machine is new this season, and deserves the special attention of racing men, as it possesses in the highest degree all the qualifications of a first-class racer.

No detail in its construction has been overlooked to make it a success, and we have reason to believe that for lightness, rigidity, and speed it will be unrivalled.

Please refer to specifications, and note the price.

SPECIFICATION.—New spring with forward action, plain hollow steel front and back forks, elliptical backbone, neat Stanley head with long centres and deep neck, improved adjustable single ball bearings to front and back wheels, improved new section hollow felloe, ⅝-in. and ½-in. best red rubber tyres, gun-metal hubs with direct spokes, 24-in. to 26-in. handle-bar, horn ends; painted plain black.

PRICE: With all the bright parts plated, and ball pedals, any size up to 58-in., £18 18/.

No. 1048. The "Club Sociable" Tricycle.

An increasing demand for double Tricycles has induced us to construct the "Club Sociable," which will be found, both in design and material, to be of our usual standard quality.

It is specially adapted to ladies' use, as the Patent "Cheylesmore" Gear can be fitted to one of the cranks.

SPECIFICATION.—Steel tube frame, front steerer, double spoon brake, all bright parts plated, ball bearings to driving wheels and cranks; painted in two colours; width, 4 feet 11 inches.

PRICE: 50-in., £25, complete with saddles or seats, and spanners.

EXTRAS: Plating steering rods and cranks, £2; ball pedals, £1; ball bearings to front wheel, 10/; painting gold lines, £1; "Cheylesmore" Action to Lady's Side, £1 10/.

No. 1050. The "Imperial Club" Tricycle.

Enquiries having been made for a front steering Tricycle, to drive both wheels, we have designed the "Imperial Club." As will be seen by reference to the specifications, it is finished in our usual high-class style. We can strongly recommend this Machine where front steering is preferred.

SPECIFICATION.—Front steering double driver, the finest steel tube frame, band brake, improved steering (simple and noiseless), ball bearings to cranks, all bright parts plated; width, 3 feet 4 inches.

PRICE: No. 1, 50-in., £22; No. 2, 50-in., £19 10/, complete with saddle or seat, and spanners.

EXTRAS: The same as "Cheylesmore."

No. 1047. The "Club" Bicycle.

This Machine is so well known all over the world that it is unnecessary to make any lengthened comments on its merits. As a sound roadster, it has, ever since its introduction, stood second to none, and the improvements we have made this season, by lengthening the centre, putting deeper neck, and improving the rubber suspension spring, have considerably added to its value.

SPECIFICATION.—Patent rubber suspension spring, the "Club" hollow front forks and steel back ditto, elliptical backbone, Stanley head with improved long centres and deep neck, adjustable double ball bearings to front wheel, patent dust-proof cones to back wheel, improved patent hollow felloe, ⅞-in. and ¾-in. best red rubber tyres, steel hubs with patent lock-nutted spokes, front wheel grip brake, 24-in. to 26-in. handle-bar (horn ends), painted in two colours.

PRICES: 48-in., £16; 50-in., £16 10/; 52-in., £17; 54-in., £17 10/; 56-in., £18. Any size under 48-in. or above 56-in. to order. Complete with rubber or rat-trap cone pedals, patent suspension saddle, spanners, and oil can.

EXTRAS: Nickelling No. 1, all bright parts, 30/; No. 2, all but felloes, 70/; No. 3, felloes included, 90/. Ball pedals, 10/; non-slipping tyres, 5/; detachable cranks, 5/; gold lines, 10/; felloes only, 5/; bent handle-bar, 7/6.

No. 1049. The "Cheylesmore Club" Tricycle.

We believe that no other Machine of the kind has ever achieved such a wonderful success as this one, since its introtroduction by us last season. This, no doubt, is in a great measure due to the patent automatic clutch with which it is fitted, which enables both wheels to be driven at the same time. This is described at length below.

In appearance it is certainly the most symmetrical and handsome Tricycle that has yet been made, as it is built upon correct artistic lines, and at the same time the nickel plating answers the two-fold purpose of improving the appearance and preventing rust.

The use of our dust-proof ball bearings to the principal working parts greatly adds to its easy running qualities, while the double spoon brake, applied simultaneously to both wheels, gives the rider perfect control over his machine on the steepest hills.

As a hill-climber we believe it is without a rival. This we gather from the many expressions of opinion that have appeared in the public papers, and the number of letters we are constantly receiving bearing testimony to this fact.

In many details it has been improved, and we have pleasure in again recommending it as one of the best specialities of our manufacture.

SPECIFICATION.—Open fronted, double driver, patent automatic clutch action, hollow steel tube frame, ball bearings to driving wheels and crank shaft, steel hubs, with patent lock-nutted spokes. All the bright parts nickel plated and polished. Double spoon brake applied simultaneously to both driving wheels. Painted in two colours. Horn handles, ⅞-in. and ¾-in. best moulded tyres. Width, 3 feet 2 inches.

PRICE: 44-in., £21; 48-in., £22; 50-in., £22 10/. Complete with saddle or seat, spanners and oil can.

EXTRAS: Nickelling the cranks and steering rod, 20/; all over, except felloes, £4 10/; Hancock's non-slipping tyres, 10/; balls to back wheel, 10/; ball pedals, 10/; painting gold lines, 15/; felloes only, 7/6. Our improved patent rubber suspension tricycle spring, for saddle or seat, 10/; extra seat for child, £2.

No. 1051. The "Cheylesmore" Folding Tricycle.

This Machine is similar in principle to the ordinary "Cheylesmore," but is so arranged that it can be folded so as to pass through a space of 26 inches. The folding is extremely simple, and takes but a few moments to accomplish.

By our patent arrangement the wheels always run parallel with each other, so that, whether extended for use or closed for convenience sake, it will run easily.

This is the only folder that has yet been made which drives both wheels.

SPECIFICATION.—Same as the "Cheylesmore;" simple folding appliance to close to 26 inches; when extended, 3 feet 2 inches.

PRICE: 44-in., £23 10/; 48-in., £24 10/.

EXTRAS: Please refer to the "Cheylesmore," No. 1049.

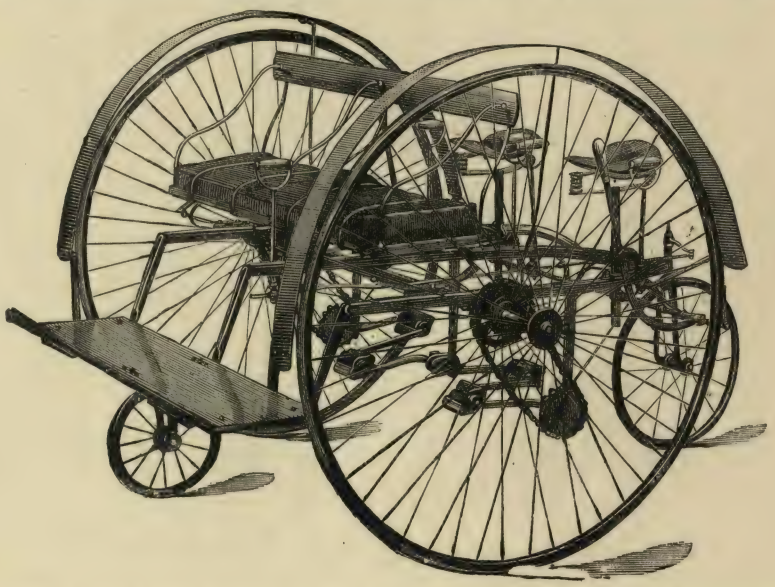
SILBER & FLEMING'S PRICE LIST
OF
THE COOLIE CYCLE,
For INDIA. Manufactured by the COVENTRY MACHINISTS' COMPANY

The Coolie Cycle.



For Four Persons.

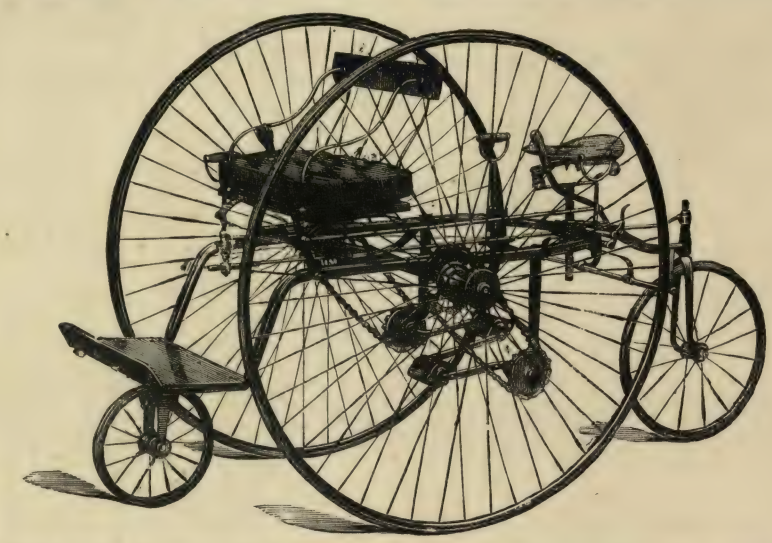
No. 1052. This machine is quite a novel construction, and is built specially for use in India and other warm climates. No. 1052 is made for four persons, two of whom sit at rest in front in a comfortable seat, while two coolies, perched on saddles behind, drive the machine by means of endless chains connecting the crank shafts and the driving wheel. The Cheylesmore Clutch Gear is used, so that the cranks remain stationary while descending hills.

The machine is so arranged that the steering as well as the brake can be managed by the front as well as by the back riders.

Specification.—It is a double driver, our patent Cheylesmore Automatic Clutch Action being used. Hollow steel tube frame, ball bearings to driving wheels and crank shafts. Steel nuts, with patent lock-nutted spokes. All the bright parts nickel plated and polished. Double spoon brake applied simultaneously to both wheels. Complete, £45.

An Umbrella can be supplied to fix to the framework if required.

The Coolie Cycle.



For Two Persons.

No. 1053. This machine is similar in construction to No. 1052, but is made to carry two persons instead of four. In this instance one sits at rest in front, while a coolie does all the work behind. It is driven by means of endless chains connecting the crank shafts and the driving wheels. The Cheylesmore Clutch Gear is used in this case, so that both wheels are driven, and the feet of the driver may be kept at rest in descending hills.

The machine can be steered and the brake applied by either the front or back rider.

Specification.—Both wheels are driven by means of our patent Automatic Clutch Action. Hollow steel tube frame, ball bearings to the driving wheels and crank shafts. Steel nuts, with patent lock-nutted spokes. All the bright parts plated and polished. Double spoon brake applied simultaneously to both wheels. Complete, £30.

An Umbrella can be supplied to fix to the framework if required.

Silber & Fleming's Price List of the "Otto" Bicycle and "Swallow" Bicycles & Tricycles.

THE "OTTO" BICYCLE.

The "Otto" Bicycle is designed on scientific principles, securing a perfect balance between two wheels, there being no leading or trailing wheel to cause the vibration found in other machines.

The sensation experienced when in motion is most agreeable, and the rider, always sitting in an upright position, avoids the risk of round shoulders and bent spine.

Only slight exertion is needed for the propulsion of the "Otto," which renders it especially suitable for those requiring gentle exercise, and on this account it has secured the approval of the medical profession.

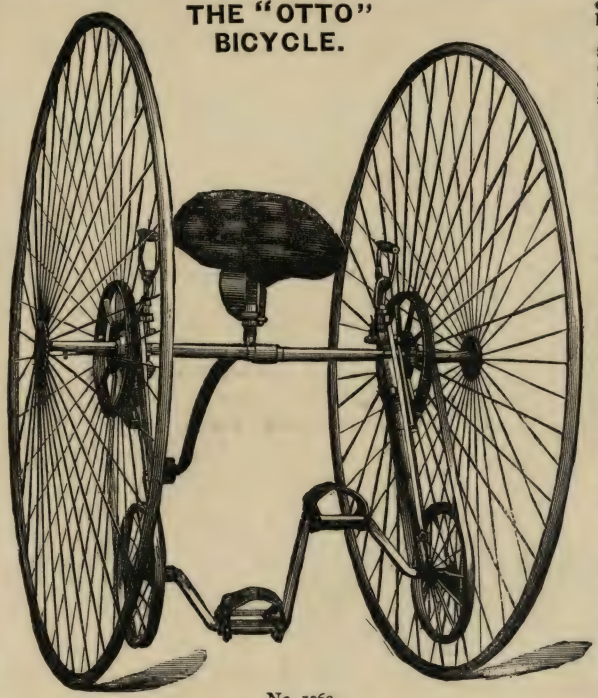
The machine adjusts itself automatically to the variations of the road. On going up hill the seat moves forward over the crank, whilst in going down hill it moves towards the rear of the machine. Rough, stony, and slippery roads may be travelled over with comparative ease and safety, and with but little splashing, so that the machine will be found of great service during the winter season.

It can be readily mounted, will remain at rest whilst the rider is seated, and may be dismounted without danger even when travelling at high speed.

In this machine the advantages of both bicycle and tricycle are united, without their inconveniences.

The extreme width is 3 ft. 2 in., but either or both wheels may be easily and rapidly removed if required.

The two large wheels revolve at opposite ends of a straight axle, and both drive and steer. They have each a hub pulley, to which the driving power is communicated from corresponding pulleys on the driving crank by means of endless steel bands, which are very flexible, and have been tested up to a strain of 3,000 lbs. Side rods, forming part of the frame of the machine, hold the crank in position, and allow it to move up and down for either slackening or tightening the bands.



No. 1062.

A steering-handle, in the shape of a horse-shoe, is placed on each side of the rider. When turned it lifts the crank, thus loosening the respective steel bands, and retards the motion of the corresponding driving-wheel. A brake-handle is placed within each steering-handle, and can be used independently of, or in conjunction with, same as required.

ALBUMS.

Albums, with leather and wooden covers, plain, or mounted with brass, nickel silver, or sterling silver, with or without shields in centre.

Albums, covered with plush of various rich colours.

Albums, with olive-wood covers, ornamented with brass, nickel silver, or sterling silver.

Presentation Albums, from £3 to £45 each, engraved with Initials, Crests, Monograms, and Regimental or other devices to order; with plain leaves edged with gold, suitable for addresses or for photographs. We have endeavoured to indicate on pages 111 and 112, for the guidance of our customers, the colours in which leather-bound albums and scrap books are usually delivered, but it will be understood that we cannot guarantee the exact shade. When no special colour is ordered, the goods will be sent assorted in the most saleable colours.

SCRAP BOOKS, POSTAGE STAMP ALBUMS, NEWSPAPER SCRAP ALBUMS, CHRISTMAS, NEW YEAR, AND BIRTHDAY CARD ALBUMS, POETRY ALBUMS, MEMORIAL CARD AND MISCELLANEOUS ALBUMS.

We are now able to quote these goods at lower prices than formerly, although the designs are far superior, and the quality certainly not inferior.

ACCOUNT BOOKS.

The coloured illustrations shown and the prices quoted on the following pages will bring under your notice the fact that we are in a position to execute orders for every description of commercial books as well and as cheaply as they can possibly be supplied. Not ten years have elapsed since we added this important branch to our business, and we surmise that our goods must have given satisfaction to our customers on account of the enormous increase in this department since its establishment. Every improvement in the methods of binding and ruling paper is adopted by us, and every advantage in the purchase of materials required for producing a sound and good article is allowed in the price quoted. Every order has our immediate attention, and when large quantities of any one special article are ordered we invariably succeed in obtaining lower prices, in which advantage our customers fully participate.

POCKET BOOKS.

The few illustrations shown on pages 178 and 179, as well as the description on page 180, represent only a very small part of the assortment contained in our warehouse, as all descriptions of pocket books, suitable to all countries, are kept by us. It will only be necessary for you to forward us a pattern or description of your special requirements, and we will endeavour to submit samples for your inspection on the shortest notice.

It is greatly to our own interest that customers should find in each of our departments every article belonging to the special trade that it represents, not only the well-known and saleable articles, but also the latest novelties; and we therefore respectfully suggest that when ordering you should authorise us to enclose with your order samples of the latest novelties (you, of course, stating at the same time to what value), as in this manner you would be enabled to place yourselves in advance of your competitors.

PENS.

Every box and every pen which bears our trade-mark offers a guarantee that the pens are well selected, and we would ask you to give them a fair trial, which we are satisfied would result in a constantly increasing demand for these articles.

PENCILS.

As the prices regulate to a very great extent the quality of the pencils, it is left to your own choice which you prefer.

ALL PRICES QUOTED ARE NETT.

J. S. VIRTUE & Co., LIMITED, LONDON.

The Registered Universal Blotting Pad, Diary, and Slate.

WITH PATENT PARADOX PENCIL.
(For use both on paper and slate.)

No. 5459½. Consists of a solid blotting pad, measuring 12½ in. by 10⅜ in., with an interleaved diary attached—seven days to a page. The diary, being fixed to the pad cannot be lost, and is always at hand for reference or memoranda. The special edition for India contains Indian postal information, telegraphic rates, ready reckoner, wages table, &c. (in Indian currency), and a table of British factory and bazaar weights—thus making a useful book of reference for office use, 18/ per doz.

When six dozen are ordered, any name can be printed on the covers free of charge.

Pocket Book and Diary.

In the "Duplex" Pocket Book the Diary is so arranged that it can be used for any year, and therefore can be commenced at any time, and continued for the ensuing twelve months. Its duality consists of two separate books being enclosed within one cover, one for the purpose of making memoranda, the other being ruled for cash. This arrangement enables housekeepers, commercial travellers, and others to keep their orders and accounts not only perfectly distinct but entirely separate, without being encumbered with two books.

No. 6136 Springless Dagger Knife, 4½-in. diamond cut horn handle, fine steel blade, 54/ per doz.

The principal advantages of the Patent Springless Clasp Pocket Knives over the ordinary Spring Knives are as follows: They can be opened and shut with the greatest ease without the aid of the thumb nail, which so often gets injured through the force required to open the ordinary Spring Knives. When open and in use the blade cannot possibly shut, thereby preventing accidents which so frequently occur with the ordinary pocket knives, through the blades closing while being used. When closed the blade is entirely covered by the handle, which protects it from rust or from damaging the pockets, or articles with which it may come in contact.

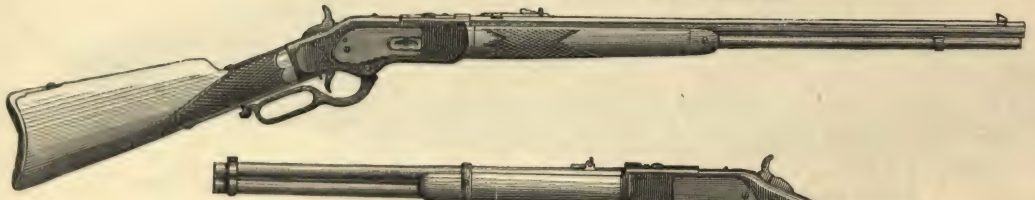
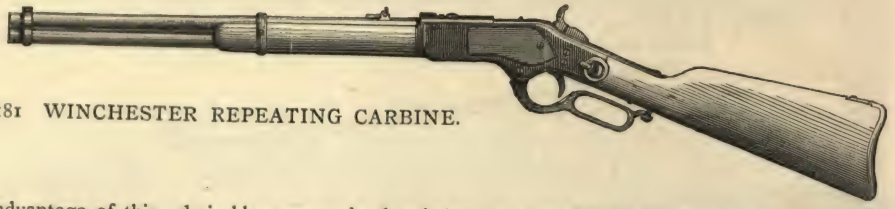
BREECH-LOADING GUNS.

WINCHESTER REPEATING RIFLES.

No. 6180 WINCHESTER REPEATING RIFLE.



No. 6181 WINCHESTER REPEATING CARBINE.



The principal advantage of this admirable weapon is, that below the barrel is a tube containing a reserve of cartridges, which are placed in the barrel one by one as the spent cartridge is ejected. This is done simply by the action of opening and closing the breech lever. The reserve cartridges may be kept intact if desired, and the weapon loaded for each discharge. These Rifles are made in three different sizes and bores.

No. 6180 Winchester Repeating Rifle, sporting pattern, with heavy barrel for accurate shooting, is ·440 bore, and has a reserve of 14 cartridges. The charge for cartridges is 40 grains powder and 200 grains bullet. Total length of Rifle 3 feet 7½ inches, and weight 8¾ lbs. Price, £5 14s., £6 2s., and £10 each.

No. 6181 Winchester Repeating Carbine. This is of the same construction and bore as No. 6180 Rifle, and has a reserve of 12 cartridges. Length 3 feet 3 inches, weight 7¼ lbs. Price £5 10s. each.

The cartridges for 6180 Rifle and 6181 Carbine are alike, price 80/ per 1000. Capped cartridge cases, 45/ per 1000; Bullets, 25/ per 1000; Re-capping caps, 7/ per 1000; loading tools, 22/ per set.

No. 6182 Winchester Repeating Rifle is similar in construction and mechanism to No. 6180, but of increased weight. It is ·450 bore, with a reserve of 12 cartridges. The charge for cartridges is 75 grains powder and 360 grains bullet. Total length of Rifle 3 feet 10 inches, weight 9¼ lbs. Price £6 2s., £6 10s., and £10 each.

No. 6183 Winchester Repeating Carbine. This is of the same construction and bore as No. 6182 Rifle, and has a reserve of nine cartridges. Length 3 feet 6 inches, weight 8¼lbs. Price £5 14s. each.

The cartridges for Nos. 6182 Rifle and 6183 Carbine are alike, price 140/ per 1000. Capped cartridge cases, 70/ per 1000; bullets, 40/ per 1000; re-capping caps, 7/ per 1000; loading tools, 27/ per set.

No. 6184 Winchester Repeating Express Rifle is similar in construction and mechanism to No. 6180 and 6182. It is ·500 bore, with a reserve of five cartridges. The charge for cartridges is 95 grains powder and 300 grains hollow fronted bullet. Total length of Rifle 3 feet 7 inches, weight 8¾lbs. Prices £7 16s. and £12; very superior finish, £18 each.

Cartridges for No. 6184, 155/ per 1000; capped cartridge cases 75/ per 1000; bullets, 45/ per 1000; re-capping caps, 7/ per 1000; loading tools 38/ per set.

COLT'S AND OTHER PATENT REVOLVERS.

No. 6220. **The Stanley Self-Extracting Revolver.**

The Stanley Patent Self-Extracting Revolver, made in ·320, ·380, and ·420 bore. The great advantages possessed by this revolver are simplicity of construction and great rapidity in loading and firing. The principal merit of this patent consists in the interior of the lock having two parts only, viz. the main spring and lifter, as shown in engraving. By taking out a screw on the left-hand side of the revolver and opening trap, these two pieces, which comprise the entire mechanism, can easily be taken out and replaced by the fingers only. On account of its simplicity it is almost impossible for the lock action to become disarranged. Prices, blued, ·320 bore, 43/; ·380 bore, 47/; ·450 bore, 48/ each. Nickel plated, 5/ each extra. Cartridges for above, ·320 bore, 35/; ·380 bore, 45/; ·450 bore, 55/ per 1000.

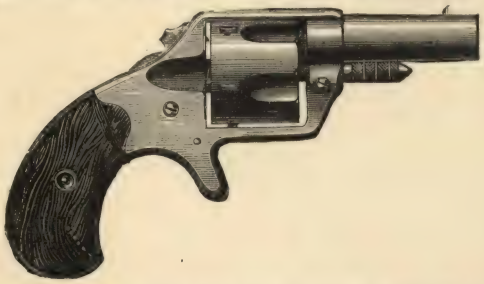
No. 6221. **Adams's Patent Breech loading Revolver.**

Adams' Patent Double Action, Central Fire, Breechloading Revolver, as supplied to Her Majesty's War Department, the New Zealand and other Colonial Governments. This revolver is made ·450 bore, has six chambers, and can be cocked for deliberate aim, or discharged in rapid succession by merely pulling the trigger. For penetration and accuracy of aim this revolver stands unrivalled. Price, first quality, plain, £4 13/6 each; first quality, engraved, £6 3/ each; first quality, extra finish and engraved, £7 5/. Also made in the New Enfield Model, ·455 bore, £5 2/6 each. Cartridges for above, ·450 bore, 55/; ·455 bore, 65/ per 1000.

No. 6222. **Colt's Patent Breechloading Revolver.**

Colt's New Patent Breechloading, Central Fire, Double Action, Six Shot Revolver, Government pattern, made in ·450 and ·455 bores. In the hammer of this pistol are three notches, the first is the safety notch, the second the half-cock notch, the third the cock notch. It should always be carried with the hammer resting in the safety notch. Length of barrel, 5½ inches. Price 75/ each. In case complete, 90/ each. Nickel plated all over, 8/6 extra. Cartridges for above, ·450 bore, 55/; ·455 bore, 65/ per 1000.

No. 6223. **Colt's Patent Five Shot Deringer Revolver.**

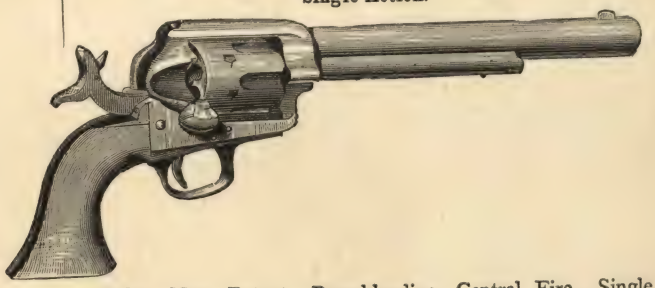


Colt's New Central Fire Five Shot Deringer Revolver in ·380 and ·410 bore, is a thoroughly efficient arm, suitable for the traveller or house defence. It weighs only 12 ounces, and is the only pistol so light in weight which fires five shots of so large a calibre. When carrying the pistol loaded, let the hammer rest on the chamber between two cartridges, the pistol is then quite safe to carry. Price 29/ each. Complete in case, 41/ each. Nickel plated, 3/ each extra. Cartridges for above, ·380 bore, 45/; ·410 bore, 45/ per 1000.

No. 6224. **Colt's Patent Deringer Pistol.**

Colt's Breechloading Deringer Pistol, ·410 bore. This pistol, which only weighs 6½ ounces, may be carried in the waistcoat pocket, and is an efficient firearm; it can be loaded and fired very rapidly. Price 15/6 each. Case for ditto, 8/6 each. Case for two pistols, 10/ each. Cartridges for above, 45/ per 1000. To load:—Set the hammer at half-cock, and swing the barrel to one side, this opens the breech. After firing, the empty cartridge case is expelled by opening the breech as far as possible.

No. 6225. **Colt's Patent Breechloading Revolver, Single Action.**



Colt's New Patent Breechloading Central Fire, Single Action, Six Shot Revolver, as adopted by the United States Government. This pistol is made in ·450 and ·455 bore, is very durable and simple in construction, and is one of the best pistols extant for military purposes. Length of barrel, 5½ inches. Price 62/6 each. Cartridges for above, ·320 bore, 35/ ; ·320, long, 40/ ; ·380 bore, 45/ ; ·380, long, 50/ ; ·450 bore, 55/ ; ·500 bore, 65/ per 1000.

Tranter's Patent Self-Extracting Revolver.

No. 6234.
SHOWN HALF-OPEN.

No. 6234. Tranter's Patent Self-Extracting, Double Action Revolver possesses the following great advantages. It can be used with the greatest facility, and can be loaded and fired with great rapidity. It will extract the empty shells without discharging the loaded ones. The chamber being kept upright in loading, the cartridges can be placed in it without risk of dropping them on the ground; nor does the process of loading require the cartridge chamber to be turned to a special place each time a cartridge is put in. The frame, when ready for firing, is held together by three separate grips, thus rendering it perfectly safe. By pressing down the locking-lever, and at the same time opening the pistol, the cartridge chamber can easily be removed for cleaning.

When the charges in the cartridge chamber require inspection, the revolver can be opened and the charges examined without removing them from the chamber, by pressing a lever at the bottom of the frame at the same time as the revolver is opened.

As the hammer is always at half-cock, the revolver cannot be discharged until required.

It is made in ·450 bore, length of barrel 6 inches, 87/6 each ; nickel plated, 95/ each.

Cartridges for above, 55/ per 1000.

FILES.

This File is to avoid the perforation, and also the annoyance of holding up the flap when searching for a paper.
They are neater in appearance, and will keep the papers cleaner than any File yet introduced.
Should the elastic (through wear) break, the papers will not fall out, and it can be renewed at the cost of one halfpenny.
The lid folding downwards takes up less room, and closes automatically.

Judson's Sponges on Cards.

It is a well-known fact that retailers of sponges (who buy them by the case) very often lose money by them, or at best do not know what they make out of them.

We are therefore laying ourselves out to supply sponges of various sizes, mounted on attractive cards, showing a good profit to both wholesale and retail.

These sponges, mounted on cards (lithographed in red and black), have a striking effect when displayed in a window.

FAMILY BIBLE WITH COMMENTARY,

In One Volume. Size, 13×11×3 in., with Marginal References, Concordance, and Introduction. This work is designed to supply the information needful to an intelligent study of the Holy Scriptures. In Nineteen Thousand Concise Notes it gives, in large type:

I. A selection from the various readings and translations of the text.
II. Explanations of the difficult words, phrases, and passages.
III. Illustrations, archæological, historical, topographical, from Oriental customs, &c.
IV. Homiletical comments, original, and selected from Matthew Henry's and similar Commentaries.

This Bible and Commentary differs also from its predecessors by the boldness of its type, which will make it attractive to the oldest and youngest reader. The type of the text is No. 4 (that of our Church quartos); the type of the notes is No. 7, which is larger than any heretofore used for notes.

THE THEOLOGICAL STUDENT'S BIBLE

(COPYRIGHT),

With wide margin for MS. Notes or Skeleton Sermons, and Index for the same. The paper is prepared for writing on with ordinary pen and ink. The Larger Edition (Type No. 10) independently of its special object, is the handsomest of portable Bibles, being an '*Edition de luxe*' (red and black), with a border line in *red*—and alphabetical index, to enable the Student to group notes on special subjects under their respective titles, and the pages are numbered throughout. The Smaller Edition (Type No. 12) is without the red border-line, and is specially prepared for the use of Teachers of the Bible.

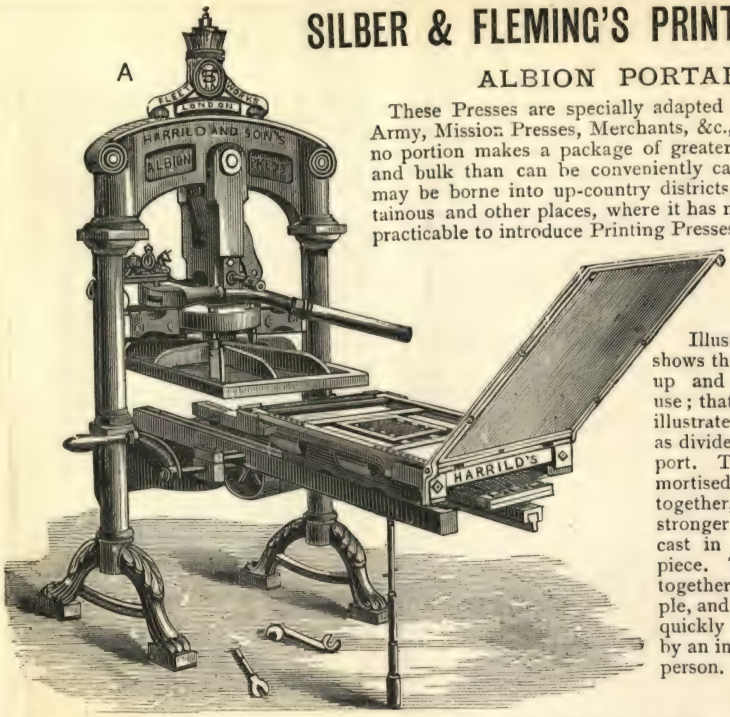
SILBER & FLEMING'S PRINTING OFFICE REQUISITES.

ALBION PORTABLE PRINTING PRESS.

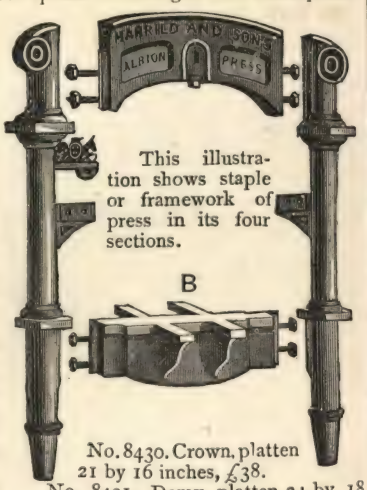
A



These Presses are specially adapted for the Army, Mission Presses, Merchants, &c., and as no portion makes a package of greater weight and bulk than can be conveniently carried, it may be borne into up-country districts, mountainous and other places, where it has not been practicable to introduce Printing Presses.

Illustration A shows the Press set up and ready for use; that marked B illustrates the Staple as divided for transport. The whole is mortised and bolted together, and is then stronger than when cast in one solid piece. The putting together is very simple, and can be very quickly done, even by an inexperienced person.

Its special advantages and description



This illustration shows staple or framework of press in its four sections.

PAPER, ENVELOPES.

Our customers are no doubt aware that we are not paper manufacturers. We own no paper mill, nor are we interested in any; but we have made such arrangements with some of the leading mill-owners that we are enabled to sell as cheaply as, and in many instances more cheaply than the same paper can be purchased direct from the mill. You sometimes hear, no doubt, that S. and F.'s Goods are not always the cheapest, but very likely you have heard so for the last quarter of a century; yet you may have observed, when from time to time you have favoured us with your visits, that our business and establishment have increased, and the catalogues which we have placed before you, or the goods which you have received from us, have enabled you to compare our prices with those quoted by other houses.

Please note that all prices quoted for paper are understood to be for small quantities, and a reduction of about ten per cent. is allowed when quantities of a hundred reams or more, or, in the case of envelopes, when a hundred thousand of any one particular pattern are ordered.

PRINTING PAPER.

Quotations for news and other printing paper, and special contracts for delivery over certain periods, can be given on application.

CARDBOARD.

The above remarks also refer to cardboard.

STRING, TWINE, CORD.

A reduction is made when quantities from five cwt. upwards are ordered.

☞ As almost every article represented in this Catalogue is kept in stock by us, and can in most cases be dispatched within a few hours after the receipt of order, you will thus be enabled to supply your customers with the goods at the shortest notice.

CHRISTMAS CARDS.

The increasing trade in Christmas Cards has resulted in our now being enabled to place before our customers more than five thousand different patterns, from 2s. per gross to 21s. each. There is no style or kind of Christmas Card made in England or on the Continent of which samples are not shown in our establishment.

PLAYING CARDS.

Specimens of Playing Cards by the well-known makers De la Rue and Goodall, are shown on pages 318 to 325. Orders for Playing Cards used in any special country or locality, not quoted or illustrated in the following pages, are executed at a short notice.

We are under the impression that you will find our prices for all descriptions of indoor and outdoor games, including **Fishing Tackle, Lawn Tennis,** and **Cricketing Goods,** as low as those of any house in the trade, for goods of similar quality.

SILBER & FLEMING'S PLAYING CARDS

MANUFACTURED BY

THOS. DE LA RUE & CO.

We have much pleasure in inviting the special attention of the Trade to our list of Playing Cards manufactured by MESSRS. DE LA RUE & CO. expressly for the New Season, and which will be found replete with varieties and qualities adapted for every possible requirement. MESSRS. DE LA RUE & CO.'S Playing Card manufacture is one of the oldest in existence; and every important improvement in the Playing Card manufacture has originated with them. In illustration of this statement we may instance the substitution, in a highly-improved form, of printed foresides in lieu of the old clumsy and unsightly stencilled pips and court cards; the introduction of double heads on the court cards, so that the cards are always the right way up in the hand; and the ornamentation of the backs by printed patterns. These patterns, originally of a simple character, have since given place to Designs of the most ornate description, demanding the highest art of the designer, the engraver, and the printer. We venture to say that, as specimens of colour-printing from engraved blocks, the printing art has produced no finer examples in any branch than are to be found amongst the patterns of their PALACE GOLD and PALACE MOGUL Playing Cards. These remarks also apply, though in a less pronounced degree, to the EXTRA-FIGURED and FIGURED MOGULS; whilst in the lower grades the patterns, though of a more inexpensive kind, are in all cases prepared with a strict regard to the requirements of good taste. The new Pattern Book and List contain several features of novelty to which, in the course of the following remarks, we shall draw attention.

PALACE GOLD MOGULS, PALACE MOGULS, and EXTRA-FIGURED MOGULS. Some very lovely designs have been added this year, amongst which we may point out THE CARD PARTY (No. 8711/597), a remarkably fine figure-composition by an eminent artist; also, THE DICE THROWER (No. 8724/604), a beautiful Japanese study. The Trade will also recollect that the whole of these superior grades are supplied under Series Nos., when so ordered, packed in card-board SHOW CASES, in which the patterns are temptingly displayed. No extra charge is made for these SHOW CASES.

In JAPANESE LACQUER, we introduce two new patterns, ornamented with characteristic designs in gold.

The "SLIDER" MOGULS, so named from the facility with which they slide in the hand when being shuffled, are much favoured by those who prefer extra thin cards, rounded at the corners, and with ordinary pips.

"DEXTER" MOGULS, in the three grades shown in the List, are recommended as embodying very special features, rendering them increasingly attractive to a large class of players who give a preference to cards bearing a marginal indication of their value. By a Patented system of Index-pips, the use of additional pips and figures at the sides of the cards is avoided, while, at the same time, the value of the cards in the hand, even when fanned out to only a limited extent, can be readily seen.

Of the old and favourite varieties, MOGULS and HARRYS, we have only to say that a large number of new and highly-ornamental patterns have been introduced, adapted for every taste. Most of these cards may also be had with rounded corners, if required.

THIRD HARRYS, the great "SHILLING" Card, have received special attention, and numerous important additions have been made to the patterns. Choice designs in Gold are now offered, to retail at a shilling; and the Fancy Backs have been recruited by a fine array of Sporting and other subjects; among them, a capital Bicycle series, a Farm-yard series, and a humourous series of Reversible Heads in which "grave and gay" are shown to be merely opposite phases of the same countenance. These "Shilling" Cards—in all the kinds—are quite a leading line with all Stationers and Fancy Dealers. Special attention is invited to Third Harrys in the "SIMPLEX" POCKET WHIST CASE, with recessed Dial Whist-Markers and Whist Rules, to retail at 1*s.* 6*d.* per box, a pack of cards included. This is a very taking line.

VICTORIA MOGULS are of the small size so universally used on the Continent. They are thin, highly burnished, and very convenient and pleasant in the hand.

The Assortment of Patterns being varied every Season, similar Designs will be substituted as the different Series are sold out.

PERFUMES FOR EXPORT, IN BOND.

Please note quotations on page 353. We are satisfied that after one trial your orders will continually increase.

The illustrations shown on pages 349 to 380 of our Perfumery, Brushes, Combs, and all goods generally sold by hairdressers and perfumers, will, we trust, enable our customers to make selections suitable to their special trade without having the goods before them to select from. We must confess, however, that we think it would be much to our mutual advantage if our customers would periodically visit our establishment. Notwithstanding our efforts, and notwithstanding the expenses incurred in placing the truest representations of the goods we keep in the hands of our customers, we can illustrate but a limited number of the articles kept in each department. The thanks and acknowledgments we have received from our numerous customers have encouraged us to persevere in producing illustrations of goods likely to suit their trade, and by thus increasing their returns and profits to produce results satisfactory to them and to ourselves at the same time.

Best English and French Perfumery and Eau de Cologne are mostly quoted for at proprietors' prices, we only reserving for ourselves the small discount allowed by the manufacturers.

Silber and Fleming, London, Importers of Musical Instruments.

Of late years the Pianoforte, owing partly to the progress of education and partly to the cheap prices at which the instrument is produced, may be heard in almost every city, village, or hamlet in the world, its sweet and entrancing tones serving to amuse and delight all classes in every community. And when the violin, flute, violoncello, or double bass can be heard in conjunction with the Pianoforte, how much is added to the enjoyment!

The Pianoforte by itself, played by a skilful artist, is capable of rendering most difficult overtures, sacred music, the latest song, or the simplest dance, and may well be universally considered the people's instrument.

There is, however, one drawback, shared indeed, more or less, by every other musical instrument, and that is the vast amount of application and years of study necessary to enable the pupil—even though he commence at a very early period of life—to become an accomplished player; time which many are unable, or unwilling, to spare for the purpose.

How great then a desideratum must be considered the Pianoforte, which can now be purchased for a moderate sum of money, and will play with or without an accompaniment of the violin, flute, violoncello, or double bass, and without requiring any further exertion, mental or physical, than the turning of a single handle, which can be done by any child or untrained person; for by this simple operation music scarcely inferior to that afforded at concerts can be obtained, with the additional advantage of being ready at all times for use in the dining-room, drawing-room, hall, or other places. Sacred or secular music, favourite and popular airs, can alike be produced.

For use on ships these instruments would be found a great source of amusement to the passengers.

They are made for extreme climates, and will resist the temperatures of all countries.

Any number of barrels can be made for the same instrument—almost any description of music can be specially arranged on the barrels, including Indian, Chinese, Japanese, &c.

SILBER & FLEMING'S MILITARY BAND INSTRUMENTS

MANUFACTURED BY

BOOSEY AND CO.

INSTRUMENTS, CLASS A.—These Instruments are of the very best quality that can be made, and are what BOOSEY & Co. usually supply to Her Majesty's Army. The highest class workmen only are employed in their manufacture.

Ditto ditto B.—These Instruments also have the Equisonant or Clear-bore Pistons, but are not made upon such expensive models as the light valve Instruments, nor are they so highly finished, but they are strong, well made, and carefully tuned, and are confidently recommended to those who do not wish to incur the expense of the A Instruments.

Ditto ditto C.—These Instruments have the Simple Pistons, and the models are the same as the B Instruments. They are strongly made and well in tune, and are of the quality that BOOSEY & Co. usually supply to Volunteer and Country Bands; in fact, they are as good as many of the so-called First-class Instruments.

N.B.—*BOOSEY & CO. may mention that they manufacture upon the premises every portion of their Brass Instruments. They deem it necessary to make this statement, as so many of the Military Instruments sold in this country as English are simply detached parts of Instruments imported from abroad and put together in England.*

The Ballad Horn is now so well known and so deservedly popular, especially among amateurs, that it is, perhaps, hardly necessary to give any lengthy description of it. For the information, however, of those who are not already acquainted with its qualifications, it may be as well to mention that it is a Tenor Instrument, fingered precisely like the B flat Cornet (than which it is a seventh lower in pitch), and possessing a delicious quality of tone greatly resembling that of the French Horn. *It is remarkably easy to blow throughout the whole of its compass,* and, being in the key of C, may be used for the performance of vocal music *without transposition*, an advantage that will be appreciated by all Brass Instrument players.

*** The Tenor Cor combines the mellow tone of the French Horn with the fulness of the Tenor. The fingering is the same as that of the Cornet, hence a great desideratum is obtained. Up to the present time, the disablement of a French Horn Player in the Band of a Regiment has caused the immediate loss of that instrument, the fingering of the French Horn being so totally different from that of any other instrument.

WITH REFERENCE TO THE PATENT COMPENSATING PISTONS,

MESSRS. BOOSEY & CO. have the pleasure to announce that they have designed, carried out, and patented an arrangement of piston action, by means of which the inaccuracy of intonation hitherto necessarily existing in certain notes on all valved instruments (whether with the piston or cylinder action) is corrected.

This inaccuracy is especially noticeable on the C sharp and the low F sharp (treble clef), fingered with all three valves, both these notes being very sharp; and, therefore, keys in which these notes, or their enharmonic changes D flat and G flat, are frequently required, have been avoided as much as possible by composers for Military Bands.

By an entirely novel arrangement of the tubing connected with the third valve, the sharpening effect otherwise produced by fingering two or more valves in combination is counteracted in the compensating pistons.

The third valve is so arranged as to bring into action extra tubing fitted to the first and second valves when it is used in combination with them, and this is done without adding a single extra moving part to the valve action, or altering the established system of fingering. The weight of the Instrument is not increased, and the arrangement is so simple that it cannot possibly get out of order.

MESSRS. BOOSEY & CO. introduce these new Instruments to the notice of the Army and the Musical Profession generally with great confidence, feeling sure that all those who value really good instruments will gladly pay the small extra cost involved in the manufacture of the Patent Compensating Pistons.

Every article is stamped with BOOSEY & CO.'S Name and Trade Mark, and the CLASS of the Instrument.

Clarionets.

10736. BOOSEY & CO.'S PERFECTED CLARIONETS in A, B flat, C or E flat, of Cocoa wood, class A, £9 9/.

These Instruments are manufactured throughout by BOOSEY & Co., and none but highly skilled workmen are employed in their manufacture. The keys are most conveniently placed for the performer, and each Instrument is tuned by an artist of experience. Unlike the French and Belgian Clarionets, all of which are French polished or varnished, these Instruments have an oil polish, and this can only be accomplished after they have been thoroughly steeped in oil for a lengthened period—a guarantee that the wood must be well seasoned.

10737. BOOSEY & CO.'S PERFECTED CLARIONETS in A, B flat, C and E flat (own make), of Ebonite, £11 11/.

The advantage of Clarionets made of the new substance called Ebonite, is that this material is not affected by extreme climates, and cannot by any possibility split. For this reason these Clarionets are particularly recommended for India. The extra cost—Two Guineas—(caused by the material and manufacture being more expensive than wood) should hardly be taken into consideration, in consequence of the great durability of these Instruments. Ebonite is rather lighter than wood.

Flutes and Piccolos, &c.

10738. Piccolos in D, E flat or F, 20/, 63/, 73/6, and £5 5s.
10739. Fifes in B flat or C, 15/ and 30/.

10741. Cone Flutes, Concert (on the old system of fingering), 84/, £8 8, £12 12/.
10742. Prattem Perfected Concert Flutes (old system of fingering), from £5 5/ to £30 9/.
10743. Boosey & Co.'s Improved Siccama Flutes, £8 8/, £12 12/, £22 1/.
10744. The Boehm Flute (cylinder), cocoa wood, silver keys, £28 7/; ebonite, silver keys, £29 8/; sterling silver, £30 9/.

The Concert or Vocal Horn is a new brass instrument specially designed by Messrs. Rudall, Carte, and Co., for Drawing-Room use. As it is pitched in C, the voice parts of Songs, Duetts, &c., can be played with Pianoforte accompaniment without transposition. It is fingered in precisely the same manner as the Cornet, to which it stands in the same relation that the Tenor Voice does to the Soprano. These Instruments are rapidly coming forward in consequence of their singularly sweet and sympathetic tone, which they combine with great power. There is no doubt that before long this will be decidedly the most popular brass instrument with amateurs.

FLUTES.

Messrs. RUDALL, CARTE, and CO. some years ago patented and introduced a flute with a new bore. The ordinary flutes up to this time had been made with a conical bore, that is, with a cylindrical head or top joint, and with the rest of the instrument becoming gradually smaller to the bottom. In the new cylinder-bore the case is reversed, the foot and the body of the flute are cylindrical, and the head-joint is a curved taper becoming smaller at the top. In the old flutes the holes had to be made of various sizes, and had to be placed where they could be reached by the fingers: this made the scale imperfect and unequal in quality. This imperfection was got over in the new flutes by means of an arrangement of mechanism which enables the finger to close a key at a distance. The holes were in consequence able to be placed in their theoretically correct positions for the first time, and the instrument was consequently made, practically speaking, perfect in intonation and equal in quality throughout. Even in its old form the flute was a great favourite, but the new cylinders, with their facilities for execution and immense advantages in tone, &c., have carried all before them. The small flutes and piccolos are found to answer best when made with the improved conical bore.

CLARIONETS.

The difficulty there is in preventing Cocoa Wood from cracking in hot climates has induced Messrs. RUDALL, CARTE, and CO. to turn their attention to the manufacture of Clarionets in Ebonite, or Vulcanised India-rubber. This material has no grain, and is impervious to moisture. It can therefore neither warp nor crack, and is consequently eminently suitable for the instrument. One of the great troubles of Clarionet Players is the necessity there is for frequently having the mouthpiece relaid in consequence of the moisture of the mouth having destroyed the "lay." This is practically done away with.

The Clarionets in Ebonite which have been made to order for professional men, &c., now and then, during the last few years, have been a decided success both in tone and durability; and the reason that it has not been brought forward before has been the difficulty of working the material. This has been overcome, and experience has shown the Ebonite Clarionets to be durable, free from the danger of cracking, and beautiful in tone; there is no doubt that they will now carry all before them.

Carte's Patent Clarionet is now becoming a very popular instrument. The great difficulty of managing the back thumb hole is done away with in it, by means of an ingenious contrivance; the hole is placed at one side, and is closed by a ring action; it may also be closed by a key worked by the thumb, and thus the ordinary fingering is retained. This Clarionet is always made with the extra C sharp action, and with the side B flat key.

PERAMBULATORS.
TENTS AND HAMMOCKS.

BEADS.

☞ As almost every article represented in this Catalogue is kept in stock by us, and can in most cases be dispatched within a few hours after the receipt of order, you will thus be enabled to supply your customers with the goods at the shortest notice.

TOYS.

"Time is money," especially to those connected with trade, and to save time is to save money. With this important fact before us, and knowing from practical experience the large expenditure of time and the difficulties attendant upon making a selection of toys, be the value £5 or £100, we have utilised the knowledge and experience gained during a period of more than thirty years in placing before you, on pages 426 to 436, illustrations and descriptions of assortments of toys; as well as special selections suitable for bazaars or other charitable purposes, on pages 421 to 425.

Pages 438 to 452 show such a rich variety of almost every description of toys, that should our customers desire to place an order either for the better assorting of their stock or to add a new branch for the sale of toys to their already established business, they would find all that is necessary to make such a department complete.

PERAMBULATORS AND INVALID CHAIRS.

All our perambulators are constructed with the latest improvements, and the greatest attention is paid to their finish, the wood employed being invariably well seasoned.

TENTS AND HAMMOCKS,

Illustrated on pages 455 to 459, are made for us by a firm which has the highest reputation throughout the world for the manufacture of these goods.

SELECTIONS OF GOODS SPECIALLY SUITED FOR SALE IN BAZAARS.

SILBER & FLEMING.

Wood Street, London.

Having been frequently asked by our customers residing in Great Britain and the Colonies to forward pro-formâ invoices of fancy goods suitable for selling in bazaars and similar places, we have now the pleasure to submit to your notice, on Pages 421 to 425, particulars of a few selections, to which can be added any articles you may wish to be forwarded, or the assortment reduced by your enumerating those not required.

With regard to the quantities of the goods mentioned in the assortments, a larger or smaller quantity of any article can be sent.

Every article is carefully selected and well packed, the consecutive numbers given on the invoices enabling customers to check the goods with the greatest facility.

More than twenty-five years' experience in, and attention paid to, all details of our business enable us to make a better and more suitable selection for the above-mentioned purposes, than parties who do not make the purchase or sale of fancy goods their especial study.

The head, arms, and legs are made of fine wax, the body is stuffed with wool, and covered with fine cotton cloth, the whole doll being proportionately and properly shaped so as to fairly represent the human form. The drawing represents a doll photographed wrapped in paper, as usually supplied to the trade. This doll is made in 20 different sizes or varieties. The smallest size, No. 11647, is 13½ inches in length; No. 11656, 22½ inches in length, and the doll here shown, No. 11663, is 32½ inches in length. The prices are not regulated entirely by the length of the doll, but also by the size of the head. Patent Umbrella Tent.

Rick Cloths and Hay Sheets.

PATENT UMBRELLA TENTS.

PRICES.

6 feet diameter at roof, 10 feet diameter at base.

No. 11912. Plain, £3 3/ each.
,, 11913. Striped, £4 4/ each.

The chief characteristics of this Tent are extreme portability and facility of erection, as no lines, ropes, or wall poles are required.

The principal feature of the patent is in the roof, which is suspended upon arms closing upwards, the reverse to an umbrella, and being erected opens out of the way of everybody.

It is destined to supersede all kinds of Umbrella Tents. A special space for its stowage during winter is not required, as a box with folding legs (forming a seat) can be had, into which the whole Tent and fittings can be packed, and which will at all times be found useful, price 15/ each.

No. 11914. Circular Tables, 7/6 each.

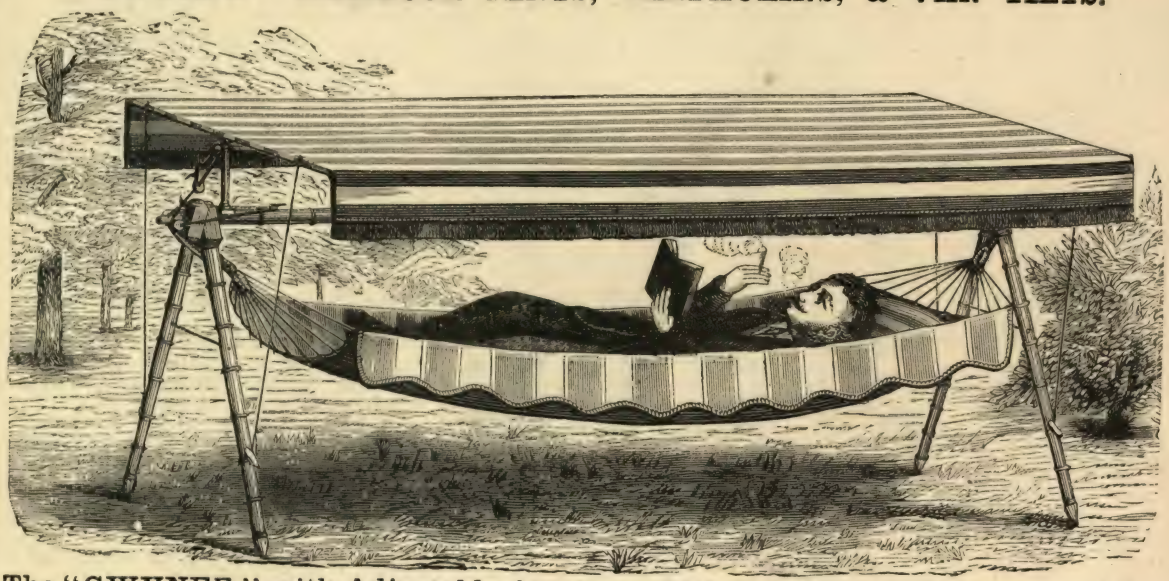
"GWYNFE" HAMMOCK TENTS, TARPAULINS, & VAN TILTS.



The "GWYNFE," with Adjustable Awning, which may be moved to any position.

This Hammock Tent was originally designed to meet the want so long felt by officers and others, of a portable waterproof shelter and sleeping place in time of war, but is equally available for other and numerous purposes.

The framework of the "Gwynfe" consists of several short pieces of ash or pine, fitted one into the other (an operation which at the most takes one minute), in such manner as to form a compact, secure, and portable frame to which the Hammock is slung, and over which the material forming the Tent is thrown. The Hammock itself is made of canvas.

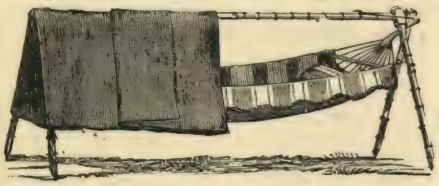
The operation of taking the Hammock Tent to pieces takes less time even than that of putting it together, and, by placing the pieces of framework side by side, and rolling the Hammock and Tent neatly around them, they can be formed into a light and portable parcel.

The "Gwynfe" is entirely independent of ropes, trees, pegs, screws, or other supports, such as are necessary for Hammocks now in use, and can be placed in any position, or readily removed to another, on grass as well as on rock, on the floor of a room as well as on the muddiest soil. It is equally suitable for the field in war or for the lawn in peace, for the tired soldier or the luxurious dilettante. It is invaluable as an accessory to field hospital appliances, and can even be used as a manger for foraging horses.

In the late Russo-Turkish War it was found that the mattresses in general use by the officers engaged were no protection whatever from the dampness of the ground, the inclemency of the weather, or the irritating attacks of hungry insects, against all of which the "Gwynfe" is absolute shelter.

It is now a universally recognised fact that the mobility of troops is one of the most essential elements of success in war, and the baggage of both officers and men has, in consequence, been reduced to a minimum of weight and space; the necessity, therefore, for some more light and portable shelter than the appliances now in use renders the great advantage of some such arrangement as the "Gwynfe" Tent the more apparent.

The "Gwynfe" is equally necessary to the health and comfort of sportsmen, gamekeepers, flock and herdsmen, squatters, ambulance surgeons, invalids—in fact, to all who have to camp out, whether from necessity or pleasure, the "Gwynfe" provides luxurious ease and absolute immunity from the weather.



The "GWYNFE" HAMMOCK TENT (Leycester's Patents)

Awarded the Only Prize Medal for Hammocks at the Paris Universal Exhibition, 1878.

The "GWYNFE," with Tent half thrown back.

INSTRUCTIONS FOR FIXING THE "GWYNFE" HAMMOCK TENT.

Join the socketed ends of the stretcher, taking care that the notches and studs fit into each other. Open the supports to the full extent allowed by the cord, and, with their pointed ends downwards, connect them one at either end to the stretcher, by placing the steel pins through the sockets. The frame will then stand upright by itself. Pass the loop (at each end of the Hammock) between the cord and the joint of the supporters, place the brass fly-nut over the steel pin, and the remainder of the loop over the hook.

Fix the pillow in position, and draw the tent or covering over the stretcher. If necessary, the tent can be fastened at the corners and in the centre by means of strings and buttons, care being taken that the brass ferrule fits over the steel pin at each end of the stretcher, and that the tent portion is buttoned on the left at the pillow end. The best way to get in is to sit gently down in the centre of the Hammock first, and then quietly lean back to the horizontal position, always avoiding to put any but a light hold on the stretcher.

DIRECTIONS FOR FIXING THE AWNING.

Place either of the small brass pillars with the hollowed foot downwards on the stretcher close up to the supports, as shown in the drawing, put the eye of the rope over the steel pin outside the brass fly-nut. Pass one of the eyelet holes in the awning over the hook of the small brass pillar, and then unroll the awning towards the other pillar (at the opposite end of the stretcher), which secure in the same way. The awning can then be tightened by pulling down the wooden runner, shown on the drawing; the small brass pillars will then remain perpendicular or at an angle to the stretcher, as required.

THE

NEW PATENT SAFETY REVOLVING PERAMBULATOR.

The advantages of these Perambulators are—

Firstly. The body of the Carriage can be turned in any direction, or can be fixed in seven different positions, and allows the person driving the Perambulator to speak or play with the child whilst driving. *Secondly*. When the body of the Carriage is fixed, the child is protected from wind and weather. *Thirdly*. The springs of the Carriage are well made of steel, and so fixed that the child feels little or no movement when the Carriage is in motion. *Fourthly*. The Carriage being placed on four wheels, is much safer than those hitherto used with three only. *Fifthly*. When fitted with bicycle wheels, the Carriage, when driven, passes almost noiselessly over the pavement, &c. *Sixthly*. The whole construction of these New Perambulators is elegant as well as substantial, and they can therefore be recommended.

During the last 25 years we have been the largest buyers and holders of Beads suitable for every market, and although manufacturers of only a few kinds of these goods, our purchases are made on such a large scale that we can meet any fair competition, and also offer the advantage of being able to execute orders very promptly.

Venetian Pound Beads are sold by the English lb., strung in bunches and packed in parcels weighing from 5 lbs. to 10 lbs. About 400 lbs. to 500 lbs. are generally packed in a case. When Beads are required to be carried inland, away from railways, &c., only 100 lbs. are packed in a case, and such cases are generally tin lined. The smallest quantity made or sold by us is one packet of each size or colour.

For prices and particulars, see pages 463 and 464.

Cut Garnets.

(In sizes and colours same as Seed Beads.)

Cut Garnets in sizes and colours of Seed Beads, for sizes, see drawing, page 461. As the prices for these fine cut beads are regulated according to the supply and demand, we are unable to give fixed prices, but can always execute orders at the lowest possible prices of the day.

Bohemian Beads.

Bohemian cut and imitation cut, as well as Venetian Beads, known by the name of "Macca Beads." (See drawing, page 461.)

The drawing on page 461 represents the length and thickness of the above Beads, which are made in the following qualities:—

Quality 1. Imitation cut Venetian Macca Beads are strung in bunches, and packed in parcels of about 5 to 10 lbs., in sizes from 00 to 11 (see drawing, page 461), varying from 3½d. to 6½d. per lb. (English), according to size. The smaller the size the higher the price. Each parcel contains one size only.

„ 2. Imitation cut Bohemian Beads, which are more highly polished, and therefore more brilliant than the Venetian imitation cut, are packed in parcels of 100 bunches (each bunch 1,200 beads), sizes from 00 to 11 (see drawing, page 461), price 4/9 a packet of 100 bunches.

„ 3. Cut beads, known as Three Times Cut, in sizes from 00 to 11 (see drawing, page 461), prices from 3d. to 5½d. per bunch of 1,200 beads, according to size. The largest sizes are the highest priced.

„ 4. Cut beads, known as Five Times Cut, in sizes from 00 to 11 (see drawing, page 461), prices from 4d. to 7d. per bunch of 1,200 beads, according to size. The larger the size the higher the price.

These beads can be made to order in almost any colour, to match silk or wool for trimming or embroidery purposes, &c. The Black Beads we generally have in stock in all sizes and qualities. Coloured Beads have to be made, and an order requires about two months to execute.

Basket Beads,

For making baskets or other ornaments, known as O. P. or O. G. beads, in any colour, at the lowest market prices.

Blue Beads for Africa.

Blue Beads, with opal lining and without lining, in all sizes, made to order at market prices.

L Cut Black Beads.

(*See drawing, page* 462.)

L Cut Beads, sizes from Nos. 1 to 21, are a black bead, known as L Cut 3 times, and made in sizes as represented by drawing.

The quality and make of this bead vary so much that we are unable to give a fixed price, but are prepared to execute orders, charging a moderate profit on cost. A large stock always on hand. Drawing No. 22, on page 462, represents L Cut Beads, 5 times cut, of which we generally hold stock in all sizes, as shown in 3 times cut from Nos. 1 to 21. The shape and make of bead (as shown on page 462, sizes Nos. 1 to 21) is made in almost every colour. The usual colours sold are ruby, crystal, anna-green, anna-yellow, blue fine, opaque, amber, opal white, and opaque white.

Pearl Beads.

(*See drawing, page* 461.)

Pearl Beads, sizes from Nos. 1 to 18, are made in various qualities.

The qualities most saleable vary from 7/6 per gross strings—viz., 12 bunches, each of 12 strings—to 36/ per gross strings.

The better qualities vary from 18/ per gross strings to 8/ per bunch of 12 strings.

A superior quality varies from 5/6 to 25/ per bunch of 12 strings.

The prices are regulated according to the size of the Pearl Beads; the larger the size the higher the price, with the exception of Seed Pearls, Pearl Oats, Droppers, Sequins, &c., in all sizes. Solid Pearl, or Lustre Beads, from about 1/6 to 3/6 per 1,000 beads. The larger the size the higher the price. Pearls for the Indian market, solid filled, Roman and other pearls.

PIPES.

It has often been questioned whether it be an advantage for fashions to be frequently changing, or, as seems to be the case of late years, *very* frequently. As a matter of fact, we think the community at large benefits by it. The various changes not only give a certain amount of pleasure and satisfaction, but they also induce a more rapid circulation of money. Very few people not connected with this trade can comprehend the numerous changes which take place in the shapes, make, materials, and mounts of pipes; and although the illustrations on the following pages exhibit an enormous variety of pipes and accessories useful and almost necessary to the smoking community, they certainly do not represent a quarter of the assortment of patterns we have in stock. They merely represent the most saleable articles which we are selling every day, and which are now generally considered in fashion.

The commonest clay or wood pipe and the finest plain or carved real meerschaum pipe find equal place in our assortment. Hookahs and cigar cabinets, tobacco cutters and jars, combined with cigar and cigarette cases and match boxes, will give variety to any tobacconist's establishment; and to assist those who are not yet acquainted with this trade, but who wish to open an establishment or to add to their already established business, we beg to draw special attention to our assortments, shown on pages 500 to 503. These selections have been made with great care and study, and the quantities have been made almost as small as possible, in order that the purchaser may receive the greatest variety for the smallest amount of money.

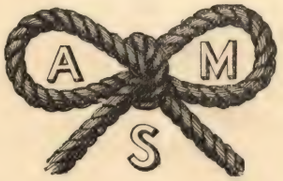
CIGARS,

REAL HAVANNAH, CONTINENTAL, AND ENGLISH.

CIGARETTES.

MATCHES.



Almost all Orders for Cigars (Foreign, as well as English) can be executed at very short notice.

Entered at Stationers' Hall.]

CIGARS AND CIGARETTES.

Before placing your orders for Cigars, may we ask you to be good enough to examine the following pages, and, not considering names or brands, to look upon the drawings as merely representing the size and shape of the cigar, and to notice our prices at the same time. If you are then satisfied that we can do this trade as well as our neighbours, and as well as we do the other branches of our business, kindly favour us with a part, if not the whole, of your orders. We think that we have the knowledge and means at our command requisite for the purchase of real Havannah cigars to the best advantage; and, as you are doubtless aware, the secret of success in this trade is to buy well, for cigars well bought are half sold. Our Continental cigars are in good repute, and have, without exception, given satisfaction to our customers for many years.

Besides the cigars shown on the following pages, we invariably have in stock the following:

No. 1.	Villar y Villar, Alfred de Rothschild, in boxes of 100	95/	per 100
No. 2.	Do. Bouquets, in boxes of 25	95/	„
No. 3.	Do. Imperiales, in boxes of 50	110/	„
No. 4.	Do. Escepcionales Rothschild, in boxes of 100	120/	„
No. 5.	Antonio Murias, Escepcionales Finos, in boxes of 50...	115/	„
No. 6.	Aguila de Oro, Cabinets, in boxes of 25	115/	„
No. 7.	Cabañas, Escepcionales, in boxes of 50	148/	„
No. 8.	H. Upmann, Escepcionales, in boxes of 50	140/	

COLOURS.

Original cases of Havana cigars contain a fair proportion of light, medium, and dark colours. Should light colours only be desired, an advance of from five to ten per cent. on quotations of list will be charged.

ASSORTMENT OF BRANDS AND SIZES.

It is impossible to give particulars of every brand and size kept in stock. On receipt of particulars of requirements we can forward quotations or sample boxes of finer grades than those comprised in our list up to £15 per hundred, and also quotations for cases under bond if goods are intended for export.

If from time to time we find any brand or size better value than the one given in our list, the best article will be substituted to ensure satisfactory execution of orders received.

The sale of English Cigars is a recent addition to our tobacco trade. The arrangements we have made are such as to render us confident in recommending those of the home market to our numerous customers.

CIGARETTES.

You will find our selections to be of good value.

MATCHES.

These we only supply by the case, on account of Insurance.

NOTICE.

The prices of Havannah or Continental Cigars are 5s. 6d. less per lb. when delivered in bond, as that is the exact amount of the duty.

ORNAMENTAL AND OTHER FURNITURE.

When commencing this part of our Catalogue, we endeavoured to place all Household Goods, represented in the following pages, in such order as they would most probably be required for furnishing either an ordinary establishment or a mansion; but, as the work progressed, we found we could not carry out this intention, and we must therefore apologise for the different classes of goods not being kept separate.

We believe that our prices for these various classes of goods, considering the quality, are as low as, if not lower than, any in the trade.

Every article is carefully examined before being dispatched, and the best packers only are employed, to ensure goods arriving at their destination in perfect condition.

BILLIARD AND BAGATELLE TABLES,

As shown on pages 535 and 536, are in general favour.

Most Household Goods, Cutlery, &c., bear our Trade Mark, which is a guarantee of good quality.

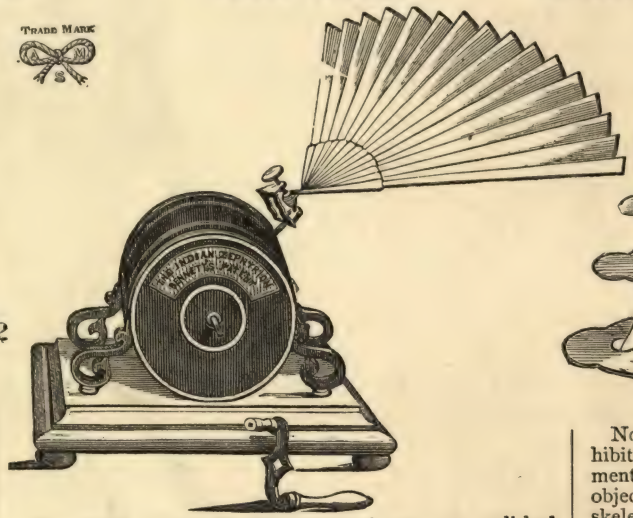
In the display of Valentines and Christmas Cards this Exhibitor is unsurpassed; and it will be found useful at all seasons of the year for bringing before the notice of the public new books, periodicals, &c.

TABLE PUNKAH.



No. 13962. Table Punkah, bronzed case on polished mahogany stand, fitted with clock-work movement, which is easily wound up by means of a key. An ordinary fan being fixed to the machine, as represented, it will continue to rise and fall for about twenty minutes, thus avoiding the manual labour of fanning. 27/6 each.

No. 13963. As 13962, but with electro-silver plated case, on polished ebony stand, 47/6 each.

ROTARY WINDOW EXHIBITOR.

No. 13964. Rotary Window Exhibitor, with clock-work movement. The Machine itself is an object of interest, as it is sent in a skeleton form, and will, by its attraction, cause the goods exhibited to be specially observed. It is easily fixed, works for 10 hours, and can be wound up again without disturbing the goods placed upon it. It will carry 8lbs. weight of goods. With mahogany frame, 45/; with covered velvet frame, 48/ each.

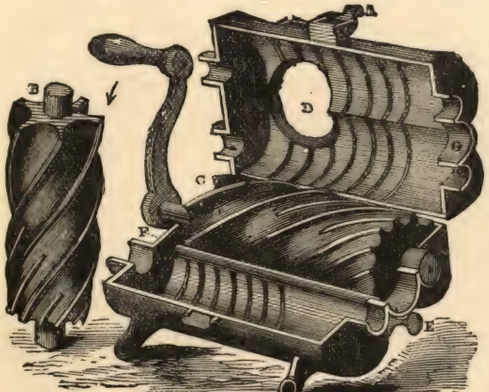
HALE'S PATENT MINCER.



No. 13969.

No. 13965. Meat Cutter, for pies only, No. 1, 25/; No. 2, 34/; No. 3, 40/; No. 4, 57/; No. 5, 84/; No. 6, £6 each. No. 5 fitted with fly-wheel, 10/6 extra.

This machine differs from all others in two or three important features, There are no knives fixed in the machine, but instead there are a number of thin steel blades attached to the shaft, and revolving with it in such a manner that they not only have a perfect cutting action. but act as propellers also. The result is that for certain kinds of work—particularly for piemakers' use—it has no equal. It also answers thoroughly well for vegetables, peel, &c. The size of cut can be regulated, and the knives easily sharpened or replaced. These machines are not made to force meat into skins.

No. 13966. Mincing Machine, plain enamelled, No. 0, 5/3; No. 1, 6/9; No. 2, 9/6; No. 3, 13/6; No. 4, 28/6; No. 5, 54/ each.

These machines are adapted for mincing all kinds of meat, fruit and vegetables for soups, pies, hashes, &c., and they are also perfect sausage-making machines, cutting and mixing the meat, and filling into the skins at one operation. They are fitted with the improved filling nozzle, instantly attached or removed without screwing.

No. 13967. Compound Mincer and Sausage Filler, with double set of knives, No. 1, 23/6; No. 2, 35/; No. 3, 50/; No. 4, 97/6; No. 5, £7 13/6 each.

These machines are of very superior finish, and are adapted for mincing meat and vegetables of all kinds. They are, from their peculiar construction, specially suitable for sausage-making and filling at one operation. The larger sizes are used by wholesale sausage-makers, as well as in public institutions, and on board steam ships, and by manufacturers of potted meats, &c. Highly recommended for export.

No. 13968. Kitchen Mincer, lined with glass enamel, 20/ each.

This machine is of very simple construction, not liable to get out of order, and is recommended as an excellent "Family" machine.

No. 13969. Hale's Patent Mincer, No. 0, 8/; No. 1, 13/6; No. 2, 24/; No. 3, 28/6 each. Fly-wheel and handle for No. 3, 7/ extra.

This machine cuts the meat instead of pulping it, and turns it out very rapidly. It is very useful as a sausage machine, as it forces the meat into the skins during the process of mincing.

No. 13909. Roller Cleaners for the above Nos. 0 and 1, 10d. each; No. 2 and 3, 1/4 each extra.

WASHING, WRINGING, AND MANGLING MACHINES.

The "Villa" Washing Machine.

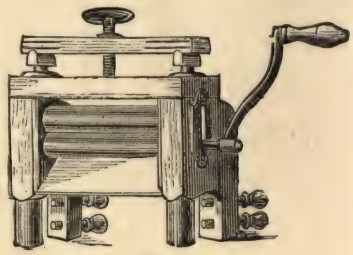
No. 13970.

No. 13970. The "Villa" Washing Machine. These machines occupy little space, and are admirably adapted for small suburban kitchens; they are confidently recommended for their cheapness, simplicity, and efficiency, and can be easily worked and managed by a girl twelve years old. They are very strong and durable, not liable to get out of order, and do not injure the most delicate fabrics.

Without india-rubber wringer, Size 1, 52/; Size 2, 66/; Size 3, 84/ each.

With india-rubber wringer (*as drawing*), Size 1, 75/; Size 2, 94/; Size 3, £6 3/ each.

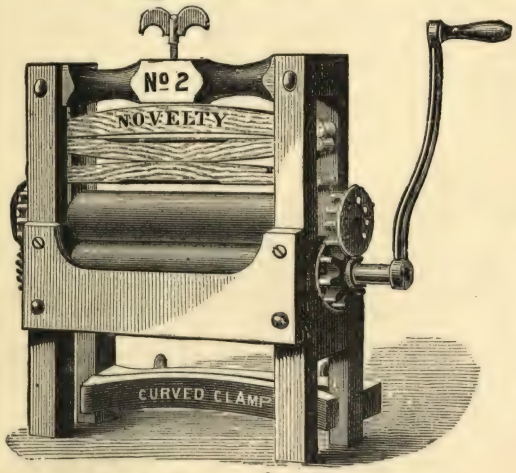
The "Alpha" Wringer.



No. 13971.

No. 13971. The "Alpha" Wringer. These machines have best vulcanised india-rubber rollers. By their use wringing is performed in about one-fourth of the time it takes by hand, and with much less injury to the clothes. They are easy to use. Care should be taken to pass the articles through evenly and not in lumps.

10-inch rollers, 21/; 12-inch, 25/; 14-inch, 35/; 16-inch, 39/ each.

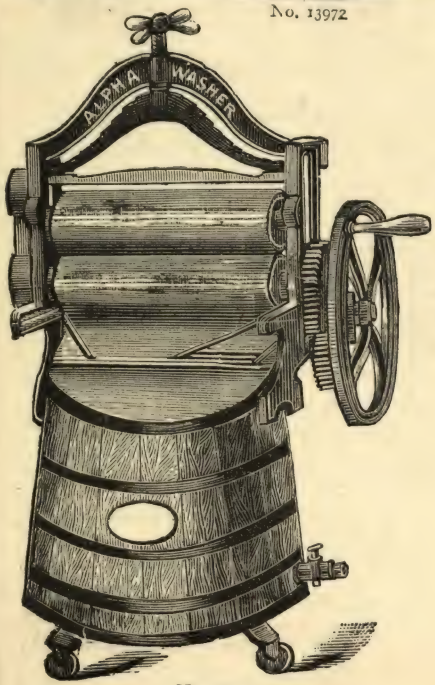


No. 13972

The "Novelty" Wringer.

No. 13972. The "Novelty" Clothes Wringer, with best india-rubber rollers and improved water board which prevents the water from splashing over. The crank and other iron parts are made of malleable iron, not liable to break, and carefully galvanised, to prevent rusting. It has the patent curved clamp for fastening the wringer to the tub, having an equal bearing on the tub the whole length of the wringer. Other wringers are merely fastened to a stave at each end, and are thus liable to wrench the staves from their places and ruin the tub.

10-inch rollers, 23/; 12-inch, 27/6 each.



No. 13073.

The "Alpha" Washer.

No. 13973. The "Alpha" Washing Machine with Wringer and Mangle combined. This is a most simple and perfect machine, and is not liable to get out of order; the dolly which changes its motion, instead of constantly going round, is simple and superior to that of any other machine; it can be taken out with ease; and when working, its excellent action causes more friction on the clothes and produces more satisfactory results than any other machine, with a greater saving of labour, time, and soap.

Size 0, 20-inch rollers, brass caps, £4 2/6; Size 1, 22-inch rollers, brass caps, £4 19/6; Size 2, 24-inch rollers, brass cap, £5 18/6 each.

Brass taps 3/9 each extra.

This machine will cut new or stale bread into slices of any thickness, which can be regulated by the guide fastened to the end of the blade-arm. The knife being a half-circle, it fairly cuts through without pressing the loaf, and will be found a great improvement on any previously introduced.

No. 14022. Boot Cleaning Machine, hard wood and best bristles.
This is one of the most useful practical labour-saving machines that can be introduced to the household.
It is quite as simple as the common hand-brushes, and economises three-fourths of the time and labour attending their use.
After a little experience, any person will clean from four to six pairs of boots in the same time that one pair could be done by hand, and owing to the rapid movement and peculiar construction of the brushes, all kinds of boots (but especially damp boots) are cleaned in a remarkably expeditious and superior manner.
It is strongly recommended to heads of households on account of its real usefulness, cheapness, effectiveness, and economy. For schools, hotels, boarding houses, clubs, large establishments, and public institutions, it is invaluable.
Hand machines, as shown in drawing, 17/6 each. Treadle machine, with stand complete, 42/ each.

each.

This machine cuts the grass perfectly, whether wet or dry, long or short. It makes no "ribs," and does not miss the bents, but leaves a beautifully smooth surface on the lawn.

The "Manchester" Lawn Mower.

No. 14044. The "Manchester" Lawn Mower, complete with grass box, 6 inches, 22/6; 7 inches, 27/; 8 inches, 31/6; 10 inches, 39/; 12 inches, 54/; 14 inches, 67/6; 16 inches, 80/ each.

This machine is of the most simple construction. The driving gear is boxed in. In work it is practically silent—the draught is very light. The handle adapts itself to the height of the person working it, who, from the absence of a grass box in front, can see his work clearly. It will cut either long, short, or wet grass, and will not miss the bents, and can be wheeled away out of gear with the cylinder raised off the ground. It is well adapted for cutting underneath shrubs, and over uneven ground or embankments. Is the best machine ever brought out for amateur gardening, and is warranted to wear well. The cylinders have five extra strong steel cutters, which are easily sharpened, and are unbreakable.

Garden Roller.

No. 14045. Garden Roller, with double cylinder, width and diameter 14 inches, 42/6; 16 inches, 47/; 18 inches, 54/; 20 inches, 62/6; 22 inches, 72/6; 24 inches, 82/; 26 inches, 90/; 28 inches, £5 7/6; 30 inches, £6 12/6 each.

This roller will work round sharp curves or angles, and turn on its length without disfiguring either grass or gravel. Though generally heavier than the ordinary pattern, it is used with less labour. The arms, being cast in one piece with the cylinder, cannot work loose. The bushes are protected by flanged collars, and the balance weight in the centre is similarly provided, to guard the axle from any grit that may find its way between the cylinders. The handle is of tubular iron, on a plan adopted with much success by the Patentee, and the ironwork and general appearance are plain and good. They are japanned, varnished, and finished in a very superior manner.

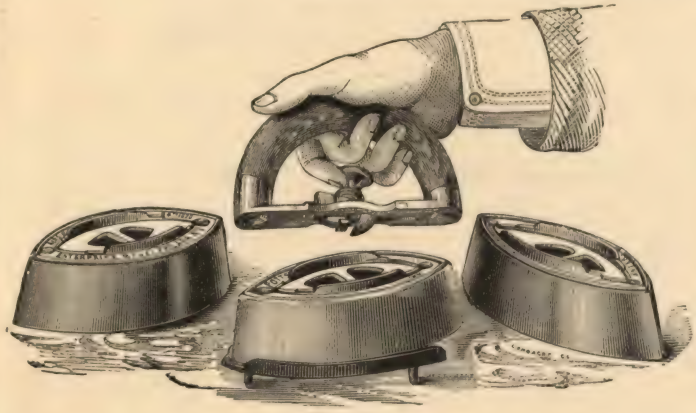
SMOOTHING AND POLISHING IRONS.



No. 14070.

No. 14070. Smoothing and Polishing Irons in sets. Three irons, one handle, and stand constitute a set, as represented in drawing. There are three sizes in each set—No. 1 weighs above five pounds, has one round end for polishing or glossing, and is very suitable for light work; No. 2 weighs about six pounds, and is for general use; No. 3 weighs about seven pounds, and is suitable for table-cloths, sheets, &c. They are made of steel, lined with a non-conducting fire-cement, the effect of which is that they heat more quickly, and retain the heat longer than solid irons. The detachable handle is made of polished wood, never becomes hot, and is of such shape as not to cramp or strain the hand or wrist. Plain polished steel, per set of three irons, one handle, and one stand, 6/6; nickel plated, 8/.

No. 14078.

The Cans are made of the best quality, extra weight and heavily-coated tin plate, have bright galvanized iron bottoms of a new form, and will stand upright when out of the tub. Each size is guaranteed to contain the full number of quarts marked thereon in addition to the space occupied by the dasher or beater.

The Tubs are of the best quality-seasoned white cedar, free from defects, and with heavy galvanized hoops.

The Cover of Tub, or Cross Bar, containing the gear wheels, is made of hard wood in preference to cast iron, preventing all liability of breaking should it receive a fall. The fittings connecting it with the tub are of malleable iron, and arranged so that the cross bar may be instantly removed by unfastening a single hook on the front, the hinged connection at the back allowing it to be turned over, or it may be detached from the tub if its use is no longer required

Directions for using, and Receipts for making Ice Cream, Water Ices, Frozen Fruits, &c., sent with each machine.

PNEUMATIC FIRE EXTINGUISHER.

No. 14079. Pneumatic Fire Extinguisher. Simple, effective, powerful, and portable. No chemicals required. Complete, with Guage, £6 11/6 each. Yokes, 4/6 extra. Deal Stands, 9/ extra. Oak Stands, 13/6 extra.

This engine is worked by compressed air and water only. It can be charged by any one in three or four minutes without expense, and may be kept always ready for immediate use, so that the moment a fire is discovered the engine is ready.

It may be carried by handles, or on the back, by man or woman, to any part of a house or building. Indispensable on sea and land.

As it can be charged by the operator up to a pressure of from 80lbs. to 100lbs. to the square inch in four minutes—shown by a pressure guage fixed to each engine, which any one may understand—a stream of water can be thrown with great force from 40 to 60 feet, and will extinguish a fierce fire in its first stage in a few seconds.

Every engine is tested up to 120lbs. pressure to the square inch, and is free from the corrosive action of acids which often render the chemical engines leaky, and even dangerous.

They can be used for putting out fires in chimneys, washing windows, plants, trees, clearing stoppages in drain pipes, &c.

STONE REFRIGERATIVE FILTERS.

No. 14140.

This Filter is made of porous stone, in the shape of a bottle, and, on account of its simplicity in use, will be found invaluable in hot climates, or where it is difficult to obtain pure water.

When filtered water is required, it is only necessary to place the Filter EMPTY, even in the most dirty water, ponds, rivers, &c., when the water will filter through the sides into the bottle, from whence it can be used in a purified state.

To keep the water in the Filter a cork tightly inserted into the neck will prevent it oozing through, consequently it is especially adapted for travelling purposes.

By slightly raising the cork the water will gently ooze through the sides, and the rapid evaporation from the surface, which always takes place in hot climates, will produce a most refreshing and delightful coolness in the water.

To clean it, it is sufficient to brush the exterior with a hard brush, or to blow into the interior, in order to open the holes in the stone.

When the Filter is new or long out of use, the first two or three filterings should be thrown away.

These Filters are made in the following sizes:—

No. 14140. Stone Refrigerative Filter, 1 pint, 27/ per doz.
No. 14140A. Stone Refrigerative Filter, 1 quart, 33/ per doz.

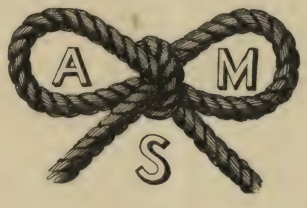
PETROLEUM & GAS HEATING & COOKING STOVES.



☞ As almost every article represented in this Catalogue is kept in stock by us, and can in most cases be dispatched within a few hours after the receipt of order, you will thus be enabled to supply your customers with the goods at the shortest notice.

SILBER LIGHT AND DUPLEX LAMPS.

Good artificial illumination, whether by gas, petroleum, or oil, is one of the greatest essentials of every household. We therefore call special attention to the following pages, which comprise a well-selected assortment of Lamps, Gas Fittings, &c., representing only a small portion of our large and well-varied stock.

The quality of every article will be found highly satisfactory, and the prices of the cheapest, as well as the best, compare favourably with those of all other manufacturers.

To assist our customers in making a representative selection of Lamps, we have much pleasure in submitting the lists of cases (shown on pages 573 and 574), which consist of such as will be found suitable for general purposes.

Unless otherwise stated, the prices do not include Globe or Chimney.

The Table Lamps are mostly drawn at a scale of one-eighth.

Most of the Lamps can be had mounted with either of the Burners shown on page 557, at the difference in price of the Burner.

Complete Catalogue of Lamps and Gas Chandeliers will be sent free on application.

Where there is any doubt as to the Chimney or Globe required, a rough sketch, with diameter of fitting, should be sent.

ALL PRICES QUOTED ARE NETT.

FURNITURE.

The arrangements we have made with some of the leading furniture manufacturers place us in a position to sell at prices which, considering the quality of the goods, will meet every competition. We regret that the size of our present premises, although large, will not permit of our making such a full exhibition as we could wish of the various classes of furniture, suitable to the humblest cottage or a palace.

IRON AND BRASS BEDSTEADS, BEDDING, IRON SAFES, AND DEED BOXES.

We have made a speciality of hardware for many years, and the study we have devoted to it gives us the advantage of offering such goods as bedsteads, safes, fenders, fireirons, and every other description of ironmongery, suitable for every establishment, country, or price.

LOOKING GLASSES, CORNICES, &c.

Our Looking Glasses are well known not only for the good quality we deliver, but also for the care we bestow on the packing of these most fragile goods.

Best leaf gold only is used in the gilding of our chimney glass frames, and the silvering of the glass is proof against ordinary damp.

We can, when ordered, make an inferior quality of chimney glasses at a considerable reduction from the prices quoted in our list; but we prefer not to execute such orders, as such goods are likely to bring our customer's name into disrepute on account of their bad wear, although made in close imitation of the goods sold by the best houses.

ALL PRICES QUOTED ARE NETT.

HALL CHAIRS.

We are prepared to give you Estimates for furnishing Private Houses or Hotels throughout, if you give us the necessary details; and you will thus be enabled to supply your intending customer with everything he may require in the Furnishing line at a moderate profit, as all the details of the execution of such an order will be done, when required, by us.

Our Glass and China Catalogue, as well as our Electro-Plated and Cutlery Catalogue, containing together more than 9,000 illustrations, offer the best assortment as yet brought under the notice of the Trade, inasmuch as almost every article illustrated is kept in stock by us; and as our name and prices do not appear on any part of these Books, you will be enabled to place them before your customers.

ıny carved back, cabriole complete £1 1 0, £1 4 0

☞ Some of the articles of Furniture quoted can be made at lower prices than given in the following pages, and we can supply them when ordered; but we do not recommend them as wearable. The following quotations will perhaps guide you in comparing the commoner with the prices of the superior goods :—

AGRICULTURAL IMPLEMENTS.

As dealers in every description of Cutlery and Household Goods, we have often been asked to submit prices of Agricultural Machinery.

In placing before you the following sketches, we will at once state that this is the only department in which we do not keep stock. The arrangements we have made with the leading manufacturers whose drawings are shown in the following pages, as well as with those who from want of space are not here represented, are such that we can satisfy those who will intrust us with their orders, both in respect to time of delivery and special low prices. The well-known names on the machines are a sufficient guarantee of their quality.

FARM AND GARDEN SEED.

We are persuaded that Webb's Farm and Garden Seed is so well known to all farmers that it needs no recommendation from us as dealers and agents.

The prices are understood to be free delivered to any port in the United Kingdom.

IMPROVED SYSTEM OF STEAM CULTIVATION.

Introduced by BARFORD & PERKINS.

Every Description of Machinery

Sold by SILBER AND FLEMING, Wood Street, LONDON.

Worked with an ordinary Portable or Traction Engine.

The following are some of the advantages of Barford and Perkins' Improved Ploughing Tackle:—

1st.—Cheapness (especially as compared with horse labour).
2nd.—The utmost simplicity.
3rd.—The employment of an ordinary Portable or Traction Engine by any Maker.
4th.—Engines of less power can be used than on any other system.
5th.—Working on the stationary system, the engine can be placed in the most convenient position for water and coal.
6th.—The headlands are narrower, and not poached up by the weight of the engines *travelling on the land*.
7th.—Any engine of 8-horse power can be profitably employed, as by the new plan of driving by pitched chain gearing off pulleys of different sizes, from 30 to 50 per cent. of extra power is obtained.

A complete set of Tackle, consisting of 4-wheel Windlass, 1,600 yards of 1¾-inch best Steel Wire Rope, 3-furrow Steam Plough, 5-tined New Self-lifting Cultivator, Double Snatch Block, necessary Rope Porters, common Anchors and Snatch Blocks, a Pair of Patent Self-moving Anchors and a set of Steel-pitched Driving Chain, and 2 Pulleys. For Portable or Traction Engines of 8 or 10-horse power . . . . . £431 10/.

BARFORD & PERKINS' IMPROVED ROYAL SOCIETY'S FIRST PRIZE

Portable Steam Food-Preparing Apparatus (No. 4.)

This well-known Apparatus is self-contained, and can be easily fixed by a farm labourer in a few minutes. It is without doubt the best, simplest, cheapest, and by far the most economical Food-Preparing Apparatus in the market. It is adapted for steaming hay, chaff, roots, corn, linseed, meal, and other compounds, and for boiling milk and water for pigs, horses, and cattle. It will steam all the food for about 50 head of cattle and as many pigs at a cost in fuel not exceeding one shilling per day; and thousands of tons of potatoes have been steamed at a cost of fuel of one farthing per cwt.

Set No. 4 consists of a wrought-iron Registered Steam Generator, one 60-gallon strong galvanised iron Compound or Boiling Pan, and a 9-bushel Revolving Root or Chaff Pan. Price, complete, as shown, £30.

Set No. 5 is similar to the No. 4 set, but the boiler is smaller, and it is provided with a 40-gallon strong galvanised iron Compound or Boiling Pan, and a 6-bushel Revolving Root or Chaff Pan. It is equal to the requirements of about 20 head of cattle and as many pigs. Cost of fuel about three-farthings per hour. Price, complete, with 12 feet of iron Flue Pipe, £23 10s.

Set No. 6 consists of the No. 5 Generator and two 40-gallon Compound Pans, as used when a considerable quantity of hot water, milk, and compounds is required, but no roots or chaff steamed. Price, £25 10s.

Set No. 7 consists of a No. 5 Generator and two 6-bushel Root or Chaff Pans, as used when roots or chaff only are required to be steamed, but no compounds. Price, £23.

Set No. 8 consists of a No. 5 Generator and one 40-gallon Compound or Boiling Pan only—presuming the root or chaff pan not to be required. Price, £18 10s.

Set No. 9 consists of the No. 5 Generator and one 6-bushel Root or Chaff Pan only, the compound pan not being required. Price, £17 10s.

Set No. 10 consists of a No. 5 Generator, with one 4-bushel Root Pan. Price, £16. With 25-gallon Compound Pan only, £17.

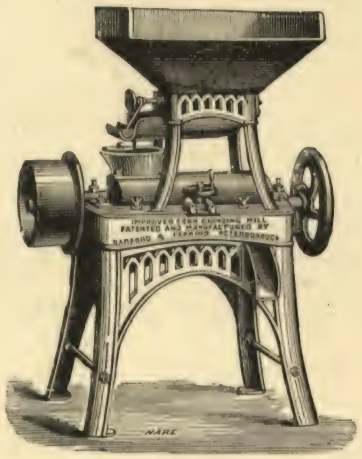
MANUFACTURERS OF AND DEALERS IN EVERY DESCRIPTION OF MACHINERY.

BARFORD & PERKINS' Patent Royal First Prize

CORN GRINDING MILLS.

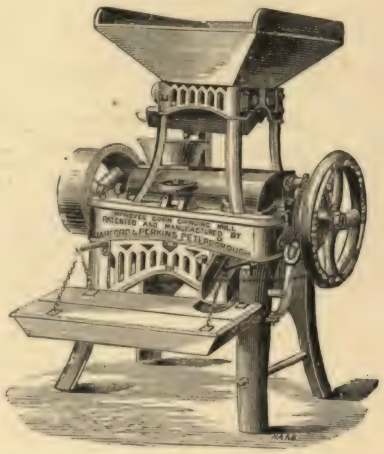
Awarded EVERY FIRST PRIZE at the great Trials of the Royal Agricultural Society of England, for Metal Corn Grinding Mills.

Will Grind Wheat, Barley, Beans, Oats, Linseed, Maize, Malt, Lentils, Spices, &c., for feeding purposes;
also Minerals and Chemicals of various kinds.



BARFORD & PERKINS have for the last twenty years made a specialité of these Mills, and during that time they have manufactured and sold over **8,000** of them. Constant improvements have been effected in their design, and the increasing demand for them is one of the most convincing proofs that they are preferred to any other kind. Although these Mills have been in competition over sixty times in every part of the world they have never been beaten.

The grinding surfaces are made of *cold blast white iron* of a kind specially prepared, and in this consists their great superiority over all others. Unlike all steel-surface cutting Mills which have hitherto been known, they require no re-cutting, the extreme hard nature of the metal indeed not allowing of it; when worn out, the wearing parts can be replaced entirely at a very small cost. The improvements lately introduced into the Mill, and patented by us, are the results of careful and thorough trial, and suggested by personal observation and experience in the working of the Mills for many years past.



FITTED WITH NEW PATENT

MEAL SEPARATOR.

This newly invented appliance will be found of great practical value to all users of Barford & Perkins' now celebrated Mills, as it enables them to separate at one operation the fine Meal for Pigs from the coarse for Cattle and Horses. The illustration explains itself—a vibration motion being produced from the cam at end of Mill; and it is most simple in its application.

Price of the Separator, 40/.

It can be readily fitted to any of Barford and Perkins' Mills now in use.

These Mills have been exported in large numbers. They are more portable, less costly, and more easily managed than mill stones; in addition to which they require no dressing, take less power, and grind or kibble very much faster. The approximate capabilities of the No. 3 Mill are—

Splitting Maize or Beans for Horses, 80 bushels an hour.
Kibbling for Cattle, 50 bushels an hour.
Grinding Fine Maize or Barley Meal for Pigs, 20 to 25 bushels an hour.

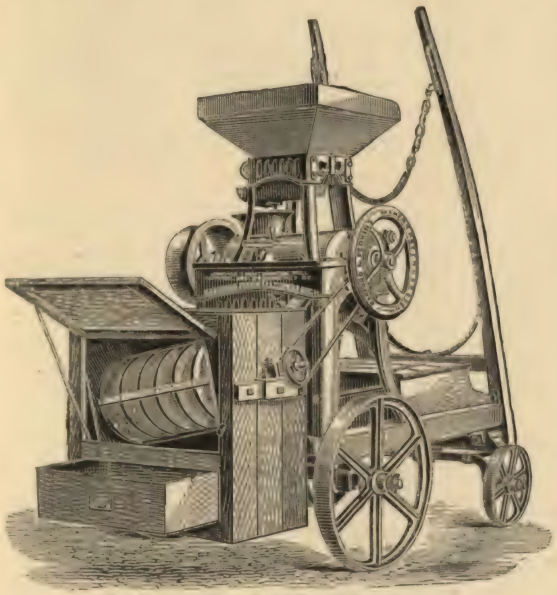
CORN GRINDING MILLS.



Fitted with Patent

FLOUR DRESSING MACHINE,

To which was awarded a SPECIAL SILVER MEDAL at the Royal Show at Oxford.

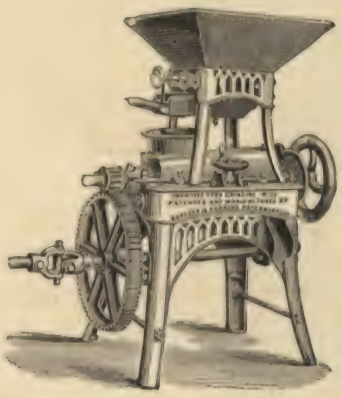
By this combination a great want has been met, as, with one Mill, grinding for Stock or Pigs and Dressing Flour for domestic use is accomplished.

Price on Portable Carriage £28
If with Dressing Machine attached, as shown above, extra . . £10

Fitted to be

DRIVEN WITH CLUTCH AND GEARING,

INSTEAD OF PULLEYS.



Mills, thus arranged, are especially adapted for export, as the gearing takes the place of an intermediate motion.

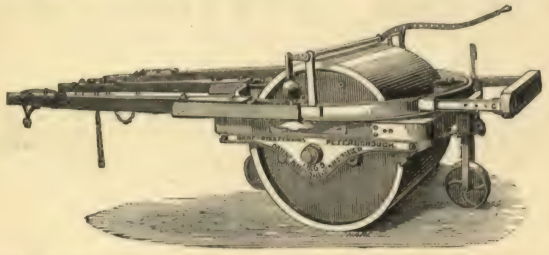
BARFORD & PERKINS' PATENT ADJUSTABLE ROLLERS



WATER BALLAST ROAD ROLLERS.

These Rollers are used for noblemen's parks, race courses, cricket grounds, lawns, landscape gardeners' and contractors' use, and for *road-making* everywhere. The cylinders are made perfectly water-tight, so that they can be loaded with water to any extent as desired. This has proved one of the most successful of modern inventions, several hundreds having been sold in England alone during the last seven years, and in all cases giving the most unqualified satisfaction. They can be made any size or weight to suit purchasers, but the undernamed are stock sizes and can be despatched on short notice.

LAWN MOWER KNIFE GRINDING MACHINE

For expediting the Repairs of Lawn Mowers, by accurately and rapidly sharpening the Spiral Cutters of these Machines.

A FEW COMMENDATORY NOTICES:—"It saves much time and our men would not be without it."——"Grinds rollers and plates so true, no occasion to 'try' them. Can repair four machines in the time it took to do one, and very much better."——"Answers its purpose very well."——"Effects a considerable saving in time and fits up the blades keen in edge and truer."

PLOUGHS AND HARROWS.

Howard's Champion Plough.

Hundreds of thousands of these Ploughs are in use throughout the world. The beams are flanged, which gives great strength where most liable to strain. Wrought iron is used instead of cast wherever practicable, and every part subject to wear or breakage can be easily and inexpensively replaced.

In the general construction of all their Ploughs, J. & F. HOWARD have uniformly aimed not only at simplicity, but durability, and in these respects, as well as in lightness of draught, *their Ploughs remain unrivalled.*

BB, a strong general purpose Plough, weight 2¾ cwt., £5 7/6 each.

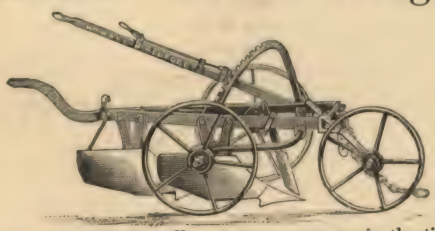
B, a pair-horse general purpose Plough, weight 2½ cwt., £5 2/6 each.

E B, a light pair-horse Plough, weight 1¾ cwt., £3 10/ each.

D D, a light one-horse Plough, weight 1½ cwt., £3 7/6 each.

Steel breast, 5/ extra. Skim coulter, 5/ extra.

Howard's Double Plough.

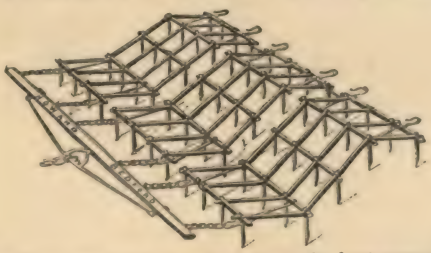


The above implement effects great economy in the time and cost of ploughing, and its success has been very marked wherever it has been introduced. The depth of work can be regulated by the lever as the Plough proceeds, and at the ends the Plough is lifted by the same lever clear off the ground.

The implement is so strongly constructed that it cannot readily be injured.

Weight 4½ cwt., £9 10/ each

Howard's Iron Harrows.



These Harrows, which are all made of the best wrought iron, have stood the test of many years' experience, and still remain unrivalled, the demand being greater than ever. Hundreds of thousands are in use throughout the world. They are strong, durable, and thoroughly adapted for all kinds of work. The tines, which are all steeled, are so fastened that they cannot get loose, and unlike Colonial-made imitations, they can be readily taken out for repair.

The following are the most useful sizes:—

No. 11, for two or three horses, 10 feet wide, weight 2¼ cwt., 80/.

No. 12, for two horses, 9½ feet wide, weight 1¾ cwt., 70/.

No. 14, for one or two horses, 8½ feet wide, weight 1¼ cwt., 63/.

No. 0, for one horse, 7½ feet wide, weight 1 cwt., 57/6.

Howard's New Simplex Plough

In these New Patent Wrought Iron and Steel Ploughs—so light in appearance, but so strong and rigid—the customary main frame or cast iron body is dispensed with, and as a substitute the hinder part of the flanged T-shaped beam, instead of running through in the ordinary way to join the handles, is curved downward towards the share.

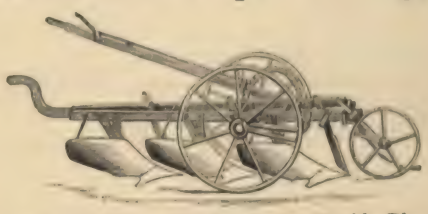
These Ploughs have stood the most searching tests, and their unequalled superiority for strength and rigidity has been completely demonstrated.

BB, a strong general purpose Plough, with steel breast, weight 2¾ cwt., £6 6/ each.

B, a pair-horse general purpose Plough, with steel breast, weight 2½ cwt., £6 each.

L B, a light pair-horse Plough, with steel breast, weight 2¼ cwt., £5 10/ each.

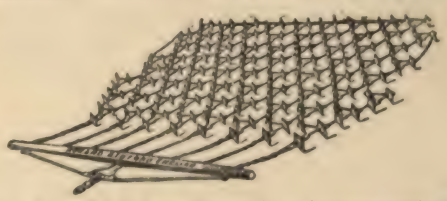
Howard's Triple Plough.



This is similar in construction to the Double Plough, but made to take three furrows. It may at once be converted into a Double Plough by the removal of the hinder body, and this is sometimes desirable on ground where the draught is heavy. It is strongly made, easily managed, and very light in draught.

Weight 5½ cwt., £12.

HOWARD'S
Patent Steel Chain Harrow.



This Patent Steel Chain Harrow is an improvement upon the ordinary Chain or Link Harrow, and is unquestionably the most perfect Grass Harrow ever produced. It will do as much in going over a field once as the ordinary Chain or Link Harrow will do at three times. It is not liable to get out of order, the points of the tripods being immovably fixed to wrought steel rods.

F W 1, for one horse, about 6½ feet wide, weight 1¼ cwt., 45/ each.

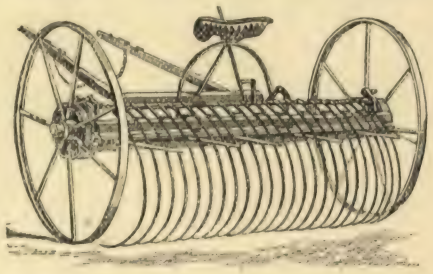
F W 2, for two horses, about 8 feet wide, weight 2¼ cwt., 70/ each.

F W 3, for three horses, about 12 feet wide, weight 3¼ cwt., 95/ each.

F W 4, for four horses, about 16 feet wide, weight 4¼ cwt., £7 7/ each.

RAKES, MOWERS, HAYMAKERS, AND REAPERS.

HOWARD'S
Anglo-American Rake.



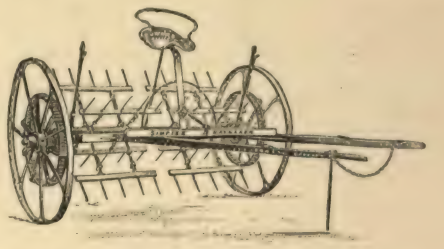
The above implement effectually meets the demand for a light, cheap Horse Rake, and whilst being as light as most of the American Rakes, it is incomparably stronger and far more durable.

J. & F. HOWARD'S simple and perfect brake principle—patented—is adopted for the lifting. A hand lever is also added for giving a choice of means for raising the teeth, and also for pressing them down to their work. The teeth can be set to work at any required distance from the ground. For strength, simplicity, efficiency, and durability, J. & F. HOWARD'S Patent Self-acting Anglo-American Rake is unquestionably far in advance of any other Light Rakes ever produced.

With 24 teeth, 52-in. wrought wheels, 8¾ feet wide, weight 4 cwt., £8 15/ each.

With 25 teeth, 52-in. wrought wheels, 10½ feet wide, weight 4¼ cwt., £9 15/ each.

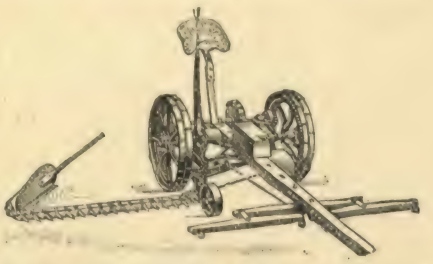
HOWARD'S
New Simplex Haymaker.



This New Patent Simplex Haymaker will be found the most perfect single-action machine ever produced. It effectually meets the requirements of those hay growers who need a machine within the power of one light horse. The Simplex is the lightest machine yet made, and it will be seen from the illustration that the Gearing is of the simplest character, and open to inspection, as well as easy to get at. The custom of making hay by the use of the back or turning action only is in many districts displacing the old method of tedding or tossing, as it is found that when grass is cut by a Mowing Machine it is generally so well laid for drying in the swathe that nothing more than once or twice turning is needed.

S, complete as above, 7½ feet wide, weight 6¼ cwt., £10 10/ each.

Howard's Simplex Mower.

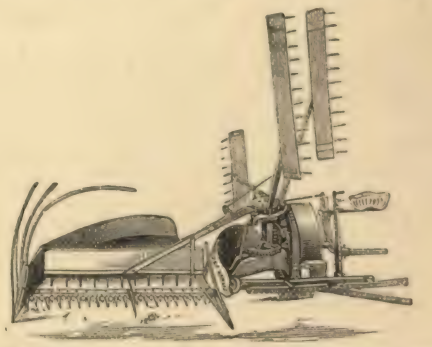


J. & F. HOWARD'S Simplex Mower is one of the lightest draught machines ever produced. It is from its construction remarkably strong, and has been found to be capable not only of cutting the heaviest crops, but of standing the roughest usage. J. & F. HOWARD'S patented principle of open Gearing is adopted. This Gearing, among other advantages, is light in weight, of great strength, and not liable, as other Gearing, to get clogged with the cut grass, there being no cogs to catch it, and no shield therefore is required.

With 2 Knives, Spring Seat, and Tool Box, containing all requisites for use in the field, weight 6 cwt., £18 10/ each.

Fitted as a combined Mower and Manual Delivery Reaper, weight 7¼ cwt., £21 10/.

Howard's Simplex Reaper.



J. & F. HOWARD'S Simplex Reaper is in every way constructed to meet the demand for a light but strong Reaper. It has a large travelling wheel, and having the fewest possible wearing parts, its value, especially where repairs are difficult to execute, can hardly be over stated. The experience of several harvests with large numbers of these Machines, both at home and abroad, and the distinguished place they have obtained in public trial fields, have fully demonstrated their superiority.

With 2 Knives, Seat, and Tool Box, containing all requisites for use in the field, weight 10¼ cwt., £31 10/.

All Prices are understood FREE Delivered at the Docks, or at nearly all Railway Stations in the United Kingdom.

MIXTURES OF

PERMANENT GRASS & CLOVER SEEDS,

SPECIALLY PREPARED FOR ALL SOILS.

ACCORDING TO MESSRS. WEBB & SONS' NEW AND EMINENTLY SUCCESSFUL SYSTEM, WHICH IS BASED UPON THE PHYSICAL CHARACTER AND SITUATION OF THE SOIL TO BE SOWN, AND THE GEOLOGICAL FORMATION OF THE DISTRICT.

Price 21s. to 32s. per Acre. Carriage Free.

THE GRASS SEEDS USED IN OUR MIXTURES ARE GATHERED BY HAND IN THE VARIOUS DISTRICTS WHERE GROWN.

WEBBS' ANNUAL CATALOGUE OF FARM SEEDS CONTAINS FULL PARTICULARS. GRATIS AND POST FREE TO ALL PARTS OF GREAT BRITAIN.

MIXTURES OF

SEEDS FOR ALTERNATE HUSBANDRY,

PREPARED

FOR ONE YEAR'S LAY.

This Mixture will produce good feed during the Autumn and in the following year. The quantity we supply per Acre is 20 lbs. Price 12s. to 14s. per Acre.

FOR TWO YEARS' LAY.

This Mixture contains large portions of Perennial Clovers, and will often stand three years. Price 14s. to 16s. per Acre.

FOR THREE OR FOUR YEARS' LAY.

This Mixture produces very heavy crops of Pasture or Hay, but must not be relied on for producing a Permanent Pasture, nor should the Corn be sown too thickly with it. Price 18s. to 20s. per Acre.

Messrs. WEBBS' "Essay on the Formation of Permanent Pastures" is an invaluable work, and should be read by all who contemplate Laying down Land to Grass. Post free on application.

THESE PRICES ARE SUBJECT TO ALTERATION, ACCORDING TO THE MARKETS.

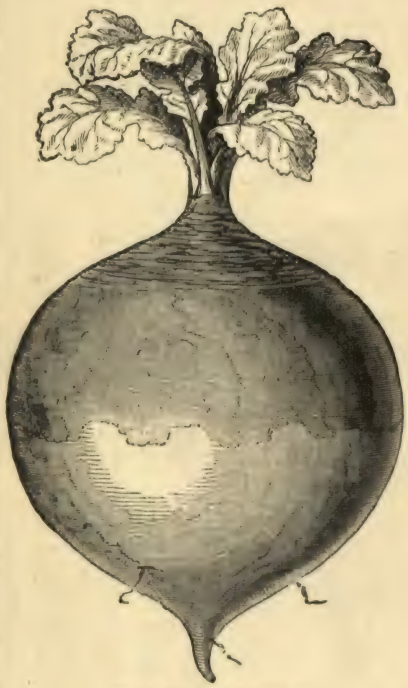
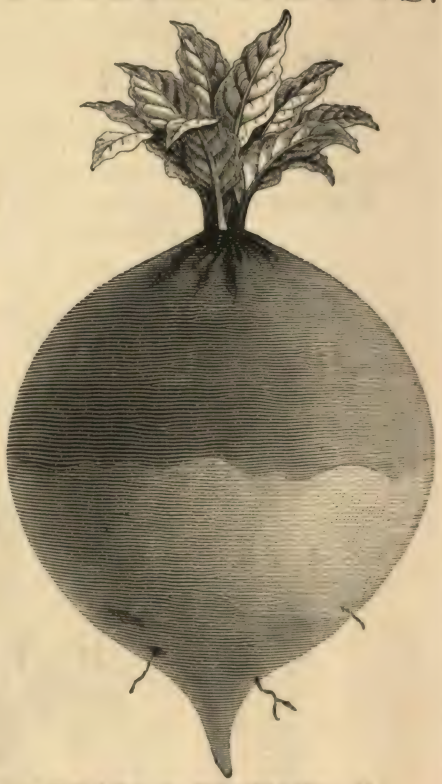
CELEBRATED
VARIETIES OF AGRICULTURAL ROOTS.



Webbs' Imperial Swede.
9d. per lb., 35/ per bushel.

Webbs' Mammoth Long Red Mangold.
1/ per lb., 95/ per cwt.



Webbs' Champion Yellow Globe Mangold.
1/ per lb., 95/ per cwt.

WEBBS' IMPERIAL SWEDE.

This celebrated Swede—the result of long-repeated and judicious selection at the Kinver Seed Farms—is acknowledged to be the best Swede in cultivation, as it combines the special properties of being the hardiest, the heaviest cropping, and the most nutritious variety. It thrives on all soils, grows to a great size—free from coarseness of neck—with single tap-root, and is unequalled for evenness of crop and keeping sound until very late in the Spring.

This variety has gained a world-wide reputation for its magnificent quality and the immense weights it produces—nearly 45 tons per acre having been grown under ordinary cultivation, and specimens weighing 39 lbs. each.

The important victories achieved by Webbs' Imperial Swede in open competitions at the principal shows and meetings, year after year—proving itself far superior to all other varieties—are without precedent.

Price 9d. per lb.; 35/ per bushel.

WEBBS' MAMMOTH LONG RED MANGOLD

Is a splendid variety, very distinct, and far superior to all other long red mangolds, being remarkable for its gigantic appearance, wide shoulder, beautiful shape, and the enormous weight it produces per acre. It possesses extraordinary feeding qualities, is very free from fibrous roots, and readily cleaned for storing. This variety is celebrated for having produced the largest and most perfect root ever seen, reaching the immense weight of 62½ lbs., which has never been equalled in the annals of root-growing.

Price 1/ per lb.; 95/ per cwt.

WEBBS' CHAMPION YELLOW GLOBE MANGOLD.

A splendid new and distinct variety, which is strongly recommended as being the best globe mangold ever offered. It produces handsome bulbs of immense size and massive appearance, particularly free from coarseness, with satin-like skin, exceedingly small top, and clean single tap-root. This mangold has grown enormous weights per acre, and is adapted for all soils, whilst for feeding and keeping properties it cannot be surpassed. It is a most profitable kind, as owing to its clean growth it is very easily stored.

Price 1/ per lb.; 95/ per cwt.

These Prices are subject to alterations according to the Markets.
